1. Welcome Home To The AR-Beacons E-Mail List

Yahoo group: AR-Beacons
Date: 2008-11-13 11:36:10 UTC
From: n1kxr@comcast.net
Topic: 1 Message: 1

Welcome Home All!

Like tuning your radio up and down the dial looking for that elusive transmitter, you've found the AR-Beacons E-Mail List, and were glad you did. This list is dedicated to the art and/or sport of radio beacons, be you a hunter or an owner/operator of one. While this list is primarily for Amateur Radio beacons, we welcome and allow all types of reports and conversations regarding radio beacons.

As a hunter, please share a bit about yourself, such as:
What are your radios?
What are your antennas?
What bands do you like to hunt for beacons on?
What is your monitoring station like?

If you happen to be an owner and/or operator of a beacon, please tell us about it. Things like:
What do you use for a transmitter?
What is your controller?
What kind of antenna do you use?
What's the beacon's power level(s)?
What is the frequency of your beacon?
Where is your beacon located? Is it in your Ham station, or remotely located?
What is the beacon's callsign and what is it's message?

Well that's just a few things to start the list off. In my upcoming posts, I'll tell you more about myself, my shack and my own beacon project.

Here's an interesting quote...

"You see, wire telegraph is a kind of a very, very long cat. You pull his tail in New York and his head is meowing in Los Angeles. Do you understand this? And radio operates exactly the same way: you send signals here, they receive them there. The only difference is that there is no cat."

-Albert Einstein (1879 - 1955), when asked to describe radio

3. N1KXR/B is on the air!

Yahoo group: AR-Beacons
Date: 2008-11-23 02:50:48 UTC
From: n1kxr@comcast.net
Topic: 3 Message: 3

Greetings all,

As of 21:00 hours EST on Saturday, November 22, 2008, the N1KXR/B Ten Meter Radio Propagation Beacon went on the air!
Plans are for this to remain operational 24/7/365 with the exception for upgrades in the near future.
The beacon can be tuned in on the frequency of 28.380, it transmits in CW mode at 15 WPM.

Full information about the beacon can be found on the beacon's webpage:
http://www.geocities.com/n1kxr/beacon.html

4. CORRECTION for N1KXR/B is on the air!

Yahoo group: AR-Beacons
Date: 2008-11-23 04:21:15 UTC
From: n1kxr@comcast.net
Topic: 4 Message: 4

Sorry folks,
In my haste to post about the beacon, and excitement of getting it on the air, I posted a typo which resulted in incorrect information.

==========
The correct frequency for the N1KXR Beacon is 28.280.00
==========

Thanks for your understanding and your anticipated reports.

73
Richard H. Wheeler - N1KXR

5. N1KXR/B is now Coordinated

Yahoo group: AR-Beacons
Date: 2008-11-24 02:36:29 UTC
From: n1kxr@comcast.net
Topic: 5 Message: 5

Greetings all,

Thank you for all the reports that have been coming in regarding the N1KXR/B. Your kind words and encouragement as to what has been accomplished so far, have been most invigorating and will help to propel me in getting the beacon up and running at full capacity as soon as possible.

The tests have gone well, the radio is staying on frequency with no drift, and with the muffin fan, no overheating. The controller is functioning well, keying the CW ID at a steady 15 WPM. While the radio is set for 5 Watts, the antenna is only a steel 102" whip cut to 10 meters, so the ERP is ~not~ the full five watts. Never-the-less, reception reports are coming in from around Western Massachusetts. The beacon is being heard!

I've been in contact with Mr. William H. Hays - WJ5O, the IARU Region 2 HF Beacon Coordinator. The N1KXR beacon is now coordinated; I chose 28.289.50 as the frequency for the beacon, so if you were tuning for the N1KXR/B on 28.280.00...it wasn't there HI HI. In addition to being coordinated, we are now listed in the IARU Region 2 HF Beacon List which is maintained by Bill - WJ5O. Here is a link: http://userpages.troycable.net/~wj5o/bcn.htm

Future plans include the acquisition of a vertical antenna which will be tuned to the beacon's frequency. Once that is done, the beacon will be moved from my residence to the top of one of the local mountains. This should improve the performance of the beacon, and allow it to provide Ten Meter propagation information for Hams and others interested in radio propagation.

If you would like to read more about the N1KXR/B beacon, please feel free to click on this link: http://www.geocities.com/n1kxr/beacon.html

I heard of your new beacon from the beacon group you had also recently joined.
http://www.explore.force9.co.uk/beacons/hfbeacons.htm
I appreciate your info and invite to your group.Looks like we had some good propagation for a few hours this evening we had not seen in a long time.My beacon is off temporarily,but hopefully it will be back running again by this coming weekend.The frequency is 28.2278 mhz using the "freakin beacon" FB2.N2NXZ/B every 5 seconds.The antenna is a horizontal aluminum dipole about 10 ft up with a transmit power of 3 watts.It was located here in the city of Rochester,NY (FN13ee).It had been moved for an experiment at a remote location 65 miles south of my QTH.It now resides in Caneadea,NY,(FN02wj)I have a website describing the project here.We had lots of fun with it so far.I am no pro with websites,a lot going on there.
http://www.freewebs.com/jimmzz91164/remoteradioandwindpower.htm
By no means am I promoting anything.It is just the easiest way to see what N2NXZ is all about.
Thanks again,and hope to hear your beacon soon.73
Jim,N2NXZ-28.2278 - Rochester,NY

8. N1KXR/B heard in Mexico!

Yahoo group: AR-Beacons
Date: 2008-11-25 23:40:49 UTC
From: n1kxr@comcast.net
Topic: 8 Message: 8

Greetings all,

I just got a report in that the N1KXR/B was heard in Mexico! A Ham with the call of XE3ARV located in Quintana Roo, Mexico sent a report in that he heard the beacon. Here is a link to his QRZ information: http://www.qrz.com/callsign/XE3ARV

I'm so kicked up with this report, it's my first international report! Not bad as seeing the beacon is only using a 102' steel whip tuned to 10 Meters, sitting only about 20' off of the ground! I'm so looking forward to getting a "real" 10 Meter antenna and getting the beacon up onto the mountain.

TEN METERS LIVES!!!!!

12. FW: PowerPole Connector Configs for Different Supply Voltages

Yahoo group: AR-Beacons
Date: 2008-11-27 11:15:38 UTC
From: n1kxr@comcast.net
Topic: 12 Message: 12

Greetings,
The below text message is being forwarded by;
Richard H. Wheeler - N1KXR
http://www.qrz.com/callsign/n1kxr
http://www.geocities.com/n1kxr

When putting up a beacon that may/will be used for ECOMM propagation use, the following article may be of fuse as it applies to the construction and/or deployment mobile beacons

----- Begin Text Message Below -----

From: The ARES E-Letter for November 26, 2008
By: Rick Palm, K1CE, Editor

PowerPole Connector Configs for Different Supply Voltages

Several readers wrote in about my Hands-On Radio experiment concerning Go-Kits. (Experiment #70, "Three-Terminal Regulators", <http://www.arrl.org/tis/info/HTML/Hands-On-Radio/>). Their suggestion is to stack the 6V PowerPole connector pair one "above" the other, so that the longer side of the connector bodies are together. The 12V PowerPole connector pair can remain in the more common side-by-side configuration shown in the article. With the two different configurations, different voltage systems cannot be connected together. I've done this in my own go-kit and urge others to do the same. The impetus for this protocol came from Al Wolfe, K9SI, Sidney, Illinois, who wrote:

"As the National Electrical Code recognized years ago, it should be impossible to plug something into the wrong voltage or current receptacle. Therefore, they set up the many standards for different kinds of plugs and receptacles for power distribution. A simple solution to the instant dilemma would be to lock the Powerpole terminals together vertically for the lower voltage instead of the more common horizontal method; i.e., with the flat contacts in parallel instead of in the same plane. This should reduce the possibility of plugging in the 6 volt devices into the 12 volt supply by mistake."

This is also noted on the HOR Web page for experiment #70. - H. Ward Silver, N0AX, Vashon Island Assistant EC, Western Washington; QST Columnist, Hands-On Radio

Date: 2008-11-30 16:07:48 UTC
From: n2nxz
Topic: 13 Message: 13

Finally made it back to the remote beacon site.Battery was fully charged again,and another method for turbine battery charging is tried.All that can be said is,Lets see what happens for the 3rd time?It was cold and snowy.Quite a hike.Nothing went as smooth as hoped.But the job is done.Now that I am home,it was great to hear N2NXZ/B make a 65 mile journey this morning.It still amazes me how a little 3 watt beacon signal travels.73
Jim,N2NXZ - 28.2278 mhz - Rochester,NY

14. Ten Meter Contest & N1KXR/B

Yahoo group: AR-Beacons
Date: 2008-12-01 08:46:41 UTC
From: n1kxr@comcast.net
Topic: 14 Message: 14

Greetings all,

The ARRL 10 Meter contest is just around the corner this coming December 12th to 14th (2008). It just so happens that I've put together a 10 Meter beacon and it's now fully functional...and just in time for the contest!!!

I've been conducting tests from my QTH these last several weeks and I've now complied all the parts I need to put this show into full operation. That being said, It's my hope to have the beacon installed on the mountain this week.

If you want to "look" for the beacon, here is some information about it:
Frequency: 28.289.50
Mode: A1A (CW)
Speed: 15 WPM
Webpage: http://www.geocities.com/n1kxr/beacon.html

Good luck to all in the contest, and to those new to this contest, here is an informational link:
http://www.arrl.org/contests/rules/2008/10-meters.html

Congrats on the beacon site.I will be listening for it.There is a
program some are using,so I gave it a try today.It really works great
for finding those weak signals.Quite amazing actually.Here is the
place to get it.There is an example on my last webpage.Pretty cool.

Yahoo is Tracking Group Members If you belong to ANY Yahoo
Groups - be aware that Yahoo is now using"Web Beacons" to track
every Yahoo Group user. It's similar to cookies, but allows Yahoo
to record every website and every group you visit, even when you're
not connected to Yahoo. Look at their updated privacy statement at

http://info.yahoo.com/privacy/us/yahoo/details.html

About half-way down the page, in the section on *cookies*, you will see
a link that says *WEB BEACONS*. Click on the phrase "Web Beacons."
On the page that opens, on the left find a box entitled "Opt-Out." In that
section find "opt-out of interest-matched advertising" link that will let
you
"opt-out" of their snooping. Click it and then click the opt-out button on
the next page.
Note that Yahoo's invasion of your privacy - and your ability to opt-out of
it - is not user-specific. It is MACHINE specific. That means you will have
to opt-out on every computer (and browser) you use. Please forward this to
your other groups. You might complain, too, but I'm not sure if anyone is
listening. I remember when they signed all users up to get spam and we had
to opt out of that a few years ago. Related

Greetings all,

This is the monthly-automated message sent out to members of the AR-Beacons e-mail list. If the AR-Beacons e-mail list is to remain in active status, it must be used periodically. As often as this list is utilized, I understand that this list will not be active at all times.

The purpose of this monthly-automated message is two-fold in its nature.
First, it serves to keep this list from being deleted due to possible periods of inactivity. Second, it provides list members, who may not have received a post in awhile, proof that they are still list members.

There is no need to respond to this message. However, if this is the only message you have received as of late, please feel free to start a new discussion, post an announcement, share a recent bit of good news, or simply send a greeting.

If you have any questions, comments or concerns please send them to the list-owner, or one of the moderators at: AR-Beacons-owner@yahoogroups.com

Thank you for being a member of AR-Beacons e-mail list.

73,
Richard - N1KXR

33. ~ POSTPONED ~ Dennis Malone's Remembrance Decal Fundraiser

Yahoo group: AR-Beacons
Date: 2009-02-20 07:39:40 UTC
From: n1kxr@comcast.net
Topic: 33 Message: 33

Greetings all,

The Spaghetti supper scheduled for Sunday, February 22, 2009 at the American Legion on Pleasant Street in Easthampton , Massachusetts has been postponed to another date, yet to be announced.

Thank you to each end everyone of you who expressed an interest in helping to raise funds to purchase a "remembrance decal" for Dennis Malone - WB1EHD. This decal is/was to be put onto a race car operated by a local race team. It is our hope to still make this dream a reality.

Please note that this event was/is not being put on my the friends of Dennis, but, by the race car team itself. Our only involvement was to promote and/or sell tickets in Dennis' name, in order to make it possible to get the decal placed onto the race car.

We are sorry for any inconvenience and/or plans you made to attend the event, and hope you will purchase tickets when the new date is known. Please feel free to pass this message along to other groups, and friends you think may need to see this message.

Again, on behalf of the friends of Dennis, thank you for your interest and support.

Yahoo group: AR-Beacons
Date: 2009-04-18 06:02:43 UTC
From: therodog
Topic: 38 Message: 38

Anyone get the K-5 to transmit and repeat their message with the "/B" in the message? I still cant figure it out, the /B means 'break'. Going to work on it this weekend, beacon should be 24/7 this weekend hopefully. Got to put some heatsinks in the radio and fans on case. Might try 'real-time'and not 'charater mode'.

Jim - N9BPE,

That seems to be the way of the (radio) world right now, the cycle is supposed to be on it's way up, however, there are reports by scientists who say that the sun is "cooler" now than it should be... Not that I want our sun to go nova, but a ~few~ solar flairs would be welcome!

Good morning. Just a report on poor beacon reception here
in central Illinois. I have two beacons (28.2325 & 50.0675)
running and no reports in ages. 73 N9BPE

72. MTARA 23rd Annual Amateur Radio & Electronics Hamfest

Yahoo group: AR-Beacons
Date: 2010-01-05 09:12:40 UTC
From: n1kxr@comcast.net
Topic: 72 Message: 72

Everyone is invited to the Mt. Tom Amateur Radio Association's 23rd Annual Amateur Radio & Electronics Hamfest. For the latest and most updated information please go to the MTARA's website: http://www.mtara.org/node/13

DATE:
Saturday, March 06, 2010

LOCATED AT:
Springfield Turnverein Club
176 Garden Street
Feeding Hills, Ma. 01030-2528

TIMES:
Doors Open:
7:00 AM for Vendors
9:00 AM for Bargain Hunters

ADMISSION:
Adults: $5.00
Children under 12 - FREE!

VENDER INFORMATION:
Vender tables are only $15.00 per each pre-registered 8 foot table.
Tailgating is available for only $10 per parking space.
For more information or to make your table reservations, please use this link:
http://www.mtara.org/node/18

DIRECTIONS:
From North or South:
Take Rte 91 to Rte 57 West. Follow Rte 57 West to the Garden Street Exit. At the end of the ramp, turn right and look for signs immediately on right.

From East or West:
Take Rte 90 (Mass Pike) to Exit 4 Rte 91. Take Rte 91 South to Rte 57 Exit. Take Rte 57 West to the Garden Street Exit. At the end of the ramp, turn right and look for signs immediately on the right.

You may also use this link for more directional information: http://www.mtara.org/node/14

Talk-in will be on the Mount Tom Repeater 146.940 (PL 127.3).

VE EXAM INFORMATION:
12:00 Noon [EST]

Space is limited, so pre-registration is strongly recommended. Be sure to bring two forms of positive ID. If you all ready licensed, bring your original Amateur Radio license and a photocopy. If you have CSCEs, bring the original along with a photocopy of each CSCE. Walk-ins are accepted as space permits. Special thanks to the KD1XP VE Team [

http://kd1xp.org] for administration of the exams!

FOOD:
Snacks provided by the Turnverein Club – Fine home-made fare.

76. Looking for odd-ball QRP item.

Yahoo group: AR-Beacons
Date: 2010-03-10 21:20:14 UTC
From: Facility 406 DM09
Topic: 76 Message: 76

New to the group, callsign is KD7JYK. I have a lot of 11m crystal controlled equipment that I convert to various Amatuer uses. Today I am looking for an item I had seen many years ago, but forgot about:

Perhaps as early as the very late 1980's, certainly by the early 90's, a company had a gimmick, a small 11m receiver, about 2/3 the size of a pack of smokes, watertight, blue anodized aluminum case, on-off switch, volume control and earphone. The case had a stainless steel belt clip and the top was white or gray plastic with a water-tight seal. The item was intended to be a receiver for swimmers, the coach, pool-side, could talk to the swimmers one-way. I don't recall the exact frequency of the system, 27.xxx, most likely different frequencies were available.

All Electronics on Vermont Ave, in Los Angeles sold bits and pieces of this system sometime around 1992-1994. I had purchased one receiver with the intent or purchasing more, scrapped the unit I had, never bought others.

What I'm looking for: Name of the product, the maufacturer, photos or ads if available, with a little luck some of the actual product in hand and ultimately, if possible, a complete system!

By any chance does one of you have some old All Electronics catalogs from the 92-94 time frame with an ad for these units?

Let me know what you have in part, whole, info, if for sale, asking price for any portion.

Thanks,

Kurt

95. 10m beacons

Yahoo group: AR-Beacons
Date: 2010-12-24 01:54:16 UTC
From: Don
Topic: 95 Message: 95

Hi to all,
I'm a new member of this group. My name is Don and call is kg4gvv.
The kg4gvv/b xmits on 28.2754 MHz with ERP of about 4 watts. The antenna
is a 5/8 ground plane up 15 feet. The transmitter is a Realistic HTX-100
and keyed by a PicoKeyer which is sold in kit form by N0XAS. The beacon
is located in Summerville, SC (EM93wa) and operates 24/7.

I only had time for a couple of scans of the 10m beacon band today.
Needless to say, there were no signals to be heard at 17:22 and 21:31 UT

Don, kg4gvv

Dec. 24, 2010

I got a pleasant surprise at 16:44 UTC while scanning the 10m beacon band. I heard VY0SNO/B. I understand this is a fairly new one. The signal was about 539 with light QSB. I quickly tuned to 28.200 MHz thinking I may hear VE8AT which is a NCDXF/IARU beacon and also in Nunavut, Canada. Nothing was heard after listening there for about six minutes. Nothing else was heard on this scan.

Topic: 103 Message: 104

While we're at it, I'd like to find CW QRP transmitter kits for 160, 17, 15, 12, 10, 6, 2 and 440 Mhz.

Talk about underutilizing a hobby! I was told kits weren't made for these bands because there was no interest. Odd, I was never interested in operating on 20, 40 and 80 like everyone else and I've been looking for decent kits for the other bands for over a decade.

A couple hundred mW is adequate, some amplifier kits with an output of about 5W would be really nice too!

Kurt

I totally agree with You Kurt. I've been a Amateur Radio operator since 2000 and have never seen QRP CW kits for these bands.
I enjoy kit building and QRP and would buy one for each band if they were available.

Anyway, this is what I heard at 15:40 UTC on the 10m beacon band.

Yahoo group: AR-Beacons
Date: 2011-01-09 03:07:54 UTC
From: Don
Topic: 88 Message: 112

Hi Ron and The Group,
My beacon rig is a HTX-100 and it produces two fairly large spurs. One on 56.552 MHz and 21.0866 MHz. None on 20m. The spurs are strong at the beacon site but are not noticeable, while mobile, 3/4 to 0ne mile away. The best part is I never had any reports of the spurs in the last five plus years of service. About two years ago I placed a band pass filter in line just so I can say "I have it filtered". It does help on 15m but not on 56.552 MHz.
Ron, I'm glad you solved that problem. I may get another transmitter and use this one for backup.
Thanks for the info Ron.

HI DON..I SEE YOUR BEACON IS BEING HEARD. CONDITIONS ARE IMPROVING. YES ITS STRANGE I HAD SPURS DEVELOP ONAT TWO DIFFERENT SITES AND WITH TWO DIFFERENT RIGS. MY HTX100 AT VE4TEN IS OPERATIONG ALONG SIDE A NUMBER OF VHF-UHF COMMERCIAL REPEATERS AND NO PROBLEMS. MY OTHER SITE AT CRYSTAL MOUNTAIN IS AT A REMOTE LOCATION AT A SKI RESORT IN THEIR FIRST AID TRAILER SO NOT MUCH AROUND IT TO BOTHER. FUN GETTING BEACON REPORTS WITH QRP. I OPERATE ON PSK31 WITH 5 WATTS AND A 23FT VERTICLE AND WORK JUST ABOUT ANYTHING I CAN HEAR. QRP AND CONDOS GET ALONG FINE HI HI. DOES ANYONE HEAR THE STATION ON 28.210 SENDING THE LETTER "a" OVER AND OVER NEVER A CALL-SIGN? OFTEN S9 HERE. A GROUP HVE SET UP A RADIO RANGE STATION SUCH AS USED TO OPERATE BELOW THE BCST BAND,BUT WHY NO CALL SIGN AND WHAT SERVICE DOES IT PERFORM JUST CAUSING QRM? ANY COMMENTS?? THE VERY BEST TO ALL IN THE NEW YEAR. 73 RON VA7PL/B VE4TEN/B

I've heard the the "A" and "N" signals on that frequency. I've even heard the single tone there also. It does identify but
very infrequently. every 8 to 10 minutes, something like that. The signals belong to WA4SZE in Manchester, TN. Here is a link
that will explain what you are hearing. http://www.youtube.com/watch?v=p-VqtNY8vpw

Don, kg4gvv

DOES ANYONE HEAR THE STATION ON 28.210 SENDING THE LETTER "a" OVER AND OVER NEVER A CALL-SIGN? OFTEN S9 HERE. A GROUP HVE
SET UP A RADIO RANGE STATION SUCH AS USED TO OPERATE BELOW THE BCST BAND,BUT WHY NO CALL SIGN AND WHAT SERVICE DOES IT
PERFORM JUST CAUSING QRM? ANY COMMENTS?? THE VERY BEST TO ALL IN THE NEW YEAR. 73 RON VA7PL/B VE4TEN/B

http://www.youtube.com/watch?v=p-VqtNY8vpw

I can't do youtube with this computer, is there a webpage?

"A GROUP HVE SET UP A RADIO RANGE STATION SUCH AS USED TO OPERATE BELOW THE BCST BAND"

Which group? Which ranging system? Which broadcast band? I know of LORAN A, B and C, Omega, Alpha, DGPS and NDBs below AMBC, HyperFix, Decca above, both shut down, but currently there is another form of DGPS operated by Cochrane Technologies with several frequencies above AMBC.

I know of several experimentation groups on the Longwave and just below the AMBC band as well as in the AMBC and above, then there is the HiFER boys and 6.1m boys at 49 MHz, I haven't heard of anyone doing any ranging work aside from a fellow I'm chatting with about radar at 10,525 MHz.

The Cochrane system is a creepy sounding signal, I used to hear it in Los Angles, CA on 1710 KHz on the car stereo.

Kurt

HI KURT. YES VERY INTERESTING. I HAVE YET TO HEAR A CALL SIGN IN ALL THE TIME I HAVE LISTENED TO IT SENDING BUT IF YOU SAY I DOES SO BE IT. OUR LOCAL AIRPORT STILL SENDS OUT THIS TYPE OF SIGNAL. I AM ON THE RADIAL HERE. I OFTEN GET THE SIGNAL S9 . I OFTEN CHECK 28.210 AS I OPERATE VE4TEB/B FROM EN19 WINNIPEG MB ON 28.210. WHEN I FIRST STARTED HEARING THIS SIGNAL I DID SOME RESEARCH AND COULDNT FIND ANYTHIG ABOUT IT SO I THOUGHT IT WAS AN INTRUDER HI HI. NICE TO SEE SOMEONE DOING SOME EXPERIMENTING ON HAM RADIO. 73 RON VA7PL _____ From: Facility 406 DM09 To: AR-Beacons@yahoogroups.com Sent: Sun, January 9, 2011 8:03:57 PM Subject: Re: [AR-Beacons] Re: 20 METER SPUR : that will explain what you are hearing. http://www.youtube.com/watch?v=p-VqtNY8vpw I can't do youtube with this computer, is there a webpage? On Feb 13, 2011 at 13:55 and 21:10 UTC no 10m beacons heard.

However, on this Feb 14th at 23:20 UTC the Solar numbers are up and that is incouraging. The Solar Flux was at 110. That's the highest it's been in 5 1/2 years. I didn't hear any beacons today but I did hear one station from Mexico on the CW portion 10m (28.025 MHz)

Things are looking up. Hang in there and maybe we can shoot a little DX, hi.

From: Don
Topic: 149 Message: 149

Feb 15, 2011

Hello All,

I never thought I would be so excited about hearing a 10m beacon. At 19:30 UTC I heard N7MA on 28.2165 MHz. This is a new one for me. According to Bill's,WJ50, 10m beacon list this beacon is located at or near Rose Lake, Idaho. The signal was a solid 559 with a small amount of QSB.

While hoping to hear more beacons out that way, I carefully finished this scan but it was not to be. This was the only beacon signal on the band.

I also listened for phone signals (28.300 to 28.500 MHz). I did hear a few ssb signals near 28.380 and 28.400. All were too weak for a meaningful QSO.

But with that one beacon in my log I'm starting to smile again. Things are looking up. The Sun is putting on an unbelievable show. Hopefully this is the start of something big.

It's alive! It's alive....LOL

73,
Don, kg4gvv

Hi All,

I haven't heard a 10m beacon or any other 10m signal in two days. I thought sure more would be heard with all the big Solar numbers. The MUFF was just shy of 28 MHz here today.

I read where there is a good chance for some good auroral activity late this evening. I'll have to check out the VHF bands tonight.
http://www.spaceweather.com/

Wishing all a very good evening.

AT 16:50 UTC I heard 2 10m beacons. DL0IGI/B in Germany and WB5QYT/B in New Mexico. Both had good signals at 559. A little QSB on the German beacon.

Hopefully I will make another 10 beacon report later today.

Just after I posted this message, I checked the Grey Line map and found that Germany was in the middle of Grey Line when DL0IGI/B was heard. That signal was probably the result of F2 propagation and enhanced by Grey Line.

The 10m band was quiet this morning and afternoon. That made no difference...I didn't hear any beacons during two scans.
Although I did hear a few DX ssb signals. Oh well, the day is not over yet. Maybe things will pick up later.

That's good news Ron. Hope we can qso during the upcoming "E" season. I use to hang out on 50.150 with a dear friend who is SK now. We had a lot of locals to stop by and chat. After my friend died everything went to pot. I guess he was the glue that held everything together. Anyway I sure miss those days on 6m.

Topic: 15 Message: 170

Greetings all,

This is the monthly-automated message sent out to members of the AR-Beacons e-mail list. If the AR-Beacons e-mail list is to remain in active status, it must be used periodically. As often as this list is utilized, I understand that this list will not be active at all times.

The purpose of this monthly-automated message is two-fold in its nature.
First, it serves to keep this list from being deleted due to possible periods of inactivity. Second, it provides list members, who may not have received a post in awhile, proof that they are still list members.

There is no need to respond to this message. However, if this is the only message you have received as of late, please feel free to start a new discussion, post an announcement, share a recent bit of good news, or simply send a greeting.

If you have any questions, comments or concerns please send them to the list-owner, or one of the moderators at: AR-Beacons-owner@yahoogroups.com

Thank you for being a member of AR-Beacons e-mail list.

73,
Richard - N1KXR

Subject: [AR-Beacons] Re: Good band opening this morning?

Wow! Jim nice opening. My first scan was not until 1900 Z. So I think I missed Africa. But I did hear some good 10m beacons out west.

1900Z
28.1770..HP1RCP..Cerro Jefe,Panama..1677 miles/2698 km
28.1830..XE1RCS..Mexico City, Mx....1500 miles/2415 km
28.1900..LU3HFA...Cordoba,CB, AR....4575 miles/7362 km
28.2165..N7MA..Rose Lake, Idaho..2035 miles/3275 km
28.2345..KA0SWT..Pueblo,CO.......1416 miles/2278 km
28.2485..N7LT...Bozeman,MT...1850 miles/2978 km
28.2880..WA7LNW..Hurricane Mesa, UT....1883 miles/3031 km
28.2942..K7RQN..Peoria, Arizona.....1846 miles/2970 km
28.3000..K6FRC..Tracy, CA..........2342 miles/3768 km

175. Amateur Radio Beacons on 10m

Yahoo group: AR-Beacons
Date: 2011-03-04 17:38:12 UTC
From: Don
Topic: 175 Message: 175

FB Dave, KA0SWT, on the card. I will send one of my cards also.

Hello All,

Listed below are the 10m beacons I heard starting at 16:49 UTC. I heard many of the same beacons yesterday. Most signals were weak to moderate.
The band seemed to be building during this scan. Hopefully a good sign.

28.1770..HP1RCP..Cerro Jefe,Panama..1677 miles/2698 km RST 529
28.1830..XE1RCS..Mexico City, Mx....1500 miles/2415 km " 559
28.2085..NB7A...Reno Nevada.....2235 miles/3597 km " 329
28.2165..N7MA..Rose Lake, Idaho.....2035 miles/3275 km " 539
28.2270..KC6WGN..Las Vegas,NV.....1992 miles/3205 km " 529
28.2495..K8NDB..Yuma, AZ.....1989 miles/3198 km " 539
28.2500..K6FRC/B2.Sutter Butte,CA...2329 miles/3749 km " 539
28.2790..WA6MHZ..Crest, CA..... 2116 miles/3405 km " 529
28.2870..WI6J..Bakersfield, CA.....2212 miles/3560 km " 529
28.2880..WA7LNW.Hurricane Mesa,UT...1883 miles/3031 km " 579
28.2940..K7RQN..Peoria, Arizona.....1846 miles/2970 km " 529
28.3000..K6FRC..Tracy, CA.....2342 miles/3768 km " 559

Sunday 06, 2011

Hi All,

This is an exciting time. I just heard two beacons, one from Greece and one from Italy. This is F2 propagation. The signals were proud and strong. The Solar numbers are up and so is the potential for meaningful
radio propagation on HF.

This scan produced a small list but to me they are very important. This is the "real" beginning of Cycle 24.

HI ALL LOTS OF BEACONS YESTERDAY.. LU VE3 W4, WORKED MATENIQUE ON RTTY I WAS QRP 5 WATTS SO THINGS LOOKING UP..CANT GET INTO WJ50 BEACON PAGE ANYMORE. 73 RON VA7PL

From: Don <kg4gvv@...>
To: AR-Beacons@yahoogroups.com
Sent: Mon, February 14, 2011 5:10:33 PM
Subject: [AR-Beacons] 10m beacons none heard

On Feb 13, 2011 at 13:55 and 21:10 UTC no 10m beacons heard.

However, on this Feb 14th at 23:20 UTC the Solar numbers are up and that is incouraging. The Solar Flux was at 110. That's the highest it's been in 5 1/2 years. I didn't hear any beacons today but I did hear one station from Mexico on the CW portion 10m (28.025 MHz)

Things are looking up. Hang in there and maybe we can shoot a little DX, hi.

Hi All,

I just finished a mid-morning scan of the 10m beacon band and the results were pleasing. There seems to be a pattern here. Most of these beacons were heard and listed on my reports of the last few days. I could hear all power levels of each International beacon listed.

183. 10m beacon and fish driftnet report

Yahoo group: AR-Beacons
Date: 2011-03-10 22:36:01 UTC
From: Don
Topic: 183 Message: 183

March 10, 2011

Hi All,

Another good propagation day on 10m. This time I heard two drift net bouys. I also heard many chicken banders on am. There seems to be a lot more of them with the current cycle than the last. Many of them interfering with beacons. The WA6MHZ/B is again sending MA6MHZ/B.
Holy Beacons Bat Man, There's a malfunction...

187. 30m beacon

Yahoo group: AR-Beacons
Date: 2011-03-14 15:44:31 UTC
From: Don
Topic: 187 Message: 187

March 14, 2011

Hello to All,

Two early scans of the 10m band (14:00 and 15:01 UTC) produced nothing but lots of noise.

But something very interesting happened when I decided to scan the 30m band at 15:08 UTC. On 10.126 MHz I heard the letter "N" over and over and then all of a sudden I started to hear the letter "A". Then I heard the station ID as WA4SZE. It ID's about every four minutes. I've heard this station on 10m many times but this is the first time I heard the two letters alternating back and forth. At times I would hear the solid tone. The 30m signal was very strong at 599

Follow this link to learn more about this fascinating signal.

FB Dave, KA0SWT, on the card. I will send one of my cards also.

Hello All,

Listed below are the 10m beacons I heard starting at 16:49 UTC. I heard many of the same beacons yesterday. Most signals were weak to moderate.
The band seemed to be building during this scan. Hopefully a good sign.

196. File - Greetings from AR-Beacons

Yahoo group: AR-Beacons
Date: 2011-04-01 09:01:13 UTC
From: AR-Beacons@yahoogroups.com
Topic: 15 Message: 196

Greetings all,

This is the monthly-automated message sent out to members of the AR-Beacons e-mail list. If the AR-Beacons e-mail list is to remain in active status, it must be used periodically. As often as this list is utilized, I understand that this list will not be active at all times.

The purpose of this monthly-automated message is two-fold in its nature.
First, it serves to keep this list from being deleted due to possible periods of inactivity. Second, it provides list members, who may not have received a post in awhile, proof that they are still list members.

There is no need to respond to this message. However, if this is the only message you have received as of late, please feel free to start a new discussion, post an announcement, share a recent bit of good news, or simply send a greeting.

If you have any questions, comments or concerns please send them to the list-owner, or one of the moderators at: AR-Beacons-owner@yahoogroups.com

Thank you for being a member of AR-Beacons e-mail list.

73,
Richard - N1KXR
List-Owner

Bill,
Glad to hear from you.I have been offline for awhile.
Paul K6FRC was asking about you.I have his email address.
Hope all is well with you.I have not been scanning for beacons for a long time,just running the propnetpsk beacon using a Cobra 135 modded for 28.1188 @ 5 watts.Hope to hear from you soon.

LOL, that's ok Jim. I thought you may be talking to me but then I wasn't sure. Hey, I know about that age thing creeping up
on you. I have a few more years on me than you do Jim. I just turned 70 last month. I'll listen for your propnet beacon. I
haven't heard it yet but I haven't heard much of anything from the northeast lately.

I just heard EA4Q/B. A little weak at 519 but it's good to hear a signal from across the big pond.

Hope to catch you on the band

Oh, have you been following the post on HF Beacons concerning the /B controversy? A few are saying that it is illegal to use
/B after a beacon call sign. Have you ever heard of such?

Don,
The discussion about the /B thing was mentioned a few years back.
I think most concluded it was ok.
I would imagine the "OO"`s would have sent us all a note by now if there was an issue.
I believe some beacon ops are "OO"s.
Any luck with the JTech ?I think I emailed you about finding the original at the women`s house in one of her drawers.
I just put it in my jacket and took it home...weird deal there.
I have a plan for that JTech for use with solar panels.
I am going to collect those solar lights for the walkway and gather as many panels as I can.
So far,have a bunch and getting good volts from them.
So far I can charge 6 AA batts well with 5 of the panels.
10m has been consistent for a few weeks now.Very predictable from 9am-6pm daily.Most activity heard is South American and surrounding areas.Tuesday I came home to find lots of European stations in my propnetpsk log.I now use an old Cobra 135 for a dedicated propnet station @ 5 watts.Looks like it changed quite a bit today though...not much heard.
10-4 on the 70 yrs old...my father turns 70 May 17.Hope you are in good health.
I had mentioned to a few of the guys on the small list about using 80m.
I have been monitoring 3955 daily.Mostly 7pm-11pm weekdays and all of the weekends if possible.There is a group who operates there frequently...but not around the clock.Not sure if you have 80m capability,but hope you give me a shout sometime.So far I have had brief copy with N4VBV and VA3XCD.
Glad to hear from you again.My internet activity is not as frequent,but will check in here often.73

Hi Jim and All,
I haven't found the time to work with the JTech. I still have to order a crystal for it but it is still on my agenda. FB on the solar panels..great idea. My 80m operating is limited to the cw portion of the band. Maybe we can qsl by cw.

I just heard a few South and Central American beacons but nothing else. This scan was started at 19:01 UTC and finished at 19:14 UTC.

28.1770..HP1RCP..Cerro Jefe,Panama..1677 miles/2698 km
28.1930..LU2ERC..Ensenada, BA,Arg... 884 miles/7860 km
28.1960..LU4JJ..Concordia,E.R.,Arg..4689 miles/7537 km
28.1970..LU5FB.Rosario,SF,Argentina.4735 miles/7620 km
28.1990..LU1FHH..El Trebol,SF,Ar....4648 miles/7479 km
28.2000..LU4AA..Buenos Aires,AR.....4896 miles/7878 km
28.2635..PT9AAA.Uncoordinated.exact location not known
28.2900..PS8RF..Teresina, Brazil....3597 miles/5789 km

Hi Don and all,
Been doing the propnet thing mostly.
Here is what it looks like now.
Interesting to say the least.
Hope the format works well.
Jim,N2NXZ

Monday
April 11, 2011

I find this a little strange. At 17:30 UTC I heard two Italian beacons and nothing else not even the usual Argentine beacons.

28.2300..IZ8CZ...Catanzaro,Italy.....5163 miles/8309 km 539
28.2425..IZ8DXB..Naples, Italy.......4994 miles/8038 km 599

Paul,K6FRC joined this group and said he sent some posts and they never showed up.
Anyone know why?

212. Re: [AR-Beacons] Group

Yahoo group: AR-Beacons
Date: 2011-04-12 23:41:00 UTC
From: Don-kg4gvv
Topic: 210 Message: 212

*PLEASE NOTE:*While membership to this group does not require approval; new members first several posts ~do~ require
approval. It is our intent to keep this a SPAM free list, and so have a zero tolerance policy for spammers.

When I first joined it would take a while for my first few post to get posted After the 5th or 6th post there was no waiting.
Hang in there and keep posting and soon there will be no waiting.

Don, kg4gvv

Hey Jim great log. Looks like you and Jeff made some good contacts. I'll catch you on one of these days. My fldigi software
has been acting up here lately. I'm looking to download another one. When I do I'll give you a call on 10m

214. Re: Group

Yahoo group: AR-Beacons
Date: 2011-04-13 14:30:33 UTC
From: N2NXZ
Topic: 210 Message: 214

Don,
Paul said he sent a few and looks like he lost patience and unsubscribed :(
Thats too bad,I wish he waited a bit but I know he had issues with all the groups we have been using and he may have gave up trying.
Would have been nice to see his reports.
Jim,N2NXZ

215. Re: Report

Yahoo group: AR-Beacons
Date: 2011-04-13 14:33:39 UTC
From: N2NXZ
Topic: 211 Message: 215

Seems Jeff and I hear each others stations quite often.
Pretty amazing really because we are both using converted SSB CB radios @ 5 watts for dedicated propnetpsk stations.
Jim,N2NXZ

Topic: 195 Message: 217

Hi guys,

Jim N2NXZ told me about this group, and this particular discussion. I'll share some info from my email archives regarding the /B issue-

"From: "Skolaut, Chuck K0BOG" cskolaut@...
To: "Paul Shinn" paul@computermail.net
Subject: RE: Ham beacon IDs
Date: Thu 04/29/10 01:20 PM

Paul,

We'll follow up on this.

73,

Chuck Skolaut, KØBOG
Field & Regulatory Correspondent
ARRL, The national association for Amateur Radio(tm)
cskolaut@...

-----Original Message-----

To: Skolaut, Chuck K0BOG
Subject: Ham beacon IDs

Hi Chuck.

Bob Patterson shared your email response with our beacon email list group.

The question came about because I operate multiple 10m beacons that are many miles apart as a propagation experiment. The findings have been shared with the 10m beacon community in real time via the email reflector list. It has been eye-opening just how localized 10m propagation can be! Everyone who is a fan of the 10m band has benefited from this research.

One of the ARRL's OOs recently sent me these two violation notices-

http://www.k6frc.com/images/K7EK-1.GIF
http://www.k6frc.com/images/K7EK-2.GIF

Way back before I put these beacons on the air, we had a discussion as to how I should properly ID them so they are easily distinguishable from each other (despite different frequencies). The IARU region 2 coordinator (Bill, WJ5O) came up with the idea of adding a number behind the /B in the callsign. All agreed. I also consulted with Laura Smith about it and she agreed. So, I programmed them and put them on the air as suggested.

(snip)

Thank you very much for your time and consideration of this matter,

Paul Shinn
K6FRC"

The follow-up wasn't via electronic mail, so unable to copy/paste here for you. But, there were many apologies made, and an understanding that /B (or /B+number) was OK.

Laura Smith was very nice, and extremely helpful on the telephone. She made some interesting off-the-record comments about the matter.

73,

Paul

Thanks, Don.

My first post was apparently never approved (does not appear). So, maybe this group doesn't work so well afterall.

I don't think I'll use it. If I take time to post something that never shows, no thanks. You have my email, if you need me, please contact me that way.

Paul

224. 10m much like 20m

Yahoo group: AR-Beacons
Date: 2011-04-19 22:33:16 UTC
From: N2NXZ
Topic: 224 Message: 224

10m has the behavior of 20m today.
The only difference is 20m yields more stations from Europe in the
morning
then change from South to West by evening.
Quite a mix so far and they are still coming in.
Here is my 8 hour report so far.
Note,this is also "2-way" activity.
Jim,N2NXZ - Rochester,NY

The Argentine beacons were present most of day.

With this third scan in the logbook I must say that this has been a fairly good day on 10m. Propagation should only get better for at least the next two years. That is when we are supposed to reach solar max.

From: N2NXZ
Topic: 233 Message: 233

10m prI have been late on my 10m propagation reports.
Here is a 48 hour to the present time look at band quality
at my QTH.
Finally something from Europe.
Jim,N2NXZ - Rochester,NY

Nice list Don!

I caught Maui HI too.

28.209 MHz KH6AP Maui HI 01:05 GMT 30APR2011

10m still good here - picking up 20 MHz WWVH Kauai, Hawaii.

Marty

Tnx Marty,

The band didn't do much here until late in the day. Nice to see the band was open later. I couldn't get in another scan. I
had too many chores (honey doo's) hi.

241. File - Greetings from AR-Beacons

Yahoo group: AR-Beacons
Date: 2011-05-01 08:47:49 UTC
From: AR-Beacons@yahoogroups.com
Topic: 15 Message: 241

Greetings all,

This is the monthly-automated message sent out to members of the AR-Beacons e-mail list. If the AR-Beacons e-mail list is to remain in active status, it must be used periodically. As often as this list is utilized, I understand that this list will not be active at all times.

The purpose of this monthly-automated message is two-fold in its nature.
First, it serves to keep this list from being deleted due to possible periods of inactivity. Second, it provides list members, who may not have received a post in awhile, proof that they are still list members.

There is no need to respond to this message. However, if this is the only message you have received as of late, please feel free to start a new discussion, post an announcement, share a recent bit of good news, or simply send a greeting.

If you have any questions, comments or concerns please send them to the list-owner, or one of the moderators at: AR-Beacons-owner@yahoogroups.com

Thank you for being a member of AR-Beacons e-mail list.

73,
Richard - N1KXR
List-Owner

May 01, 2011

Hi All,

On this early scan I heard for the first time a beacon, CX5AZ/B, in Uruguay. I had to listen for six minutes to ID. QSB was bad and this beacon Id's one time during the beacon string or once every minute.

I welcome the new beacon from Uruguay but I would like to make a constructive suggestion. Id more often during the beacon string and shorten the delay time between strings. During that 30 second delay one may scan right past your frequency.

Thank You for this beacon. It will help complete the propagation picture.

253. Facebook changes effecting AR-Beacons

Yahoo group: AR-Beacons
Date: 2011-05-09 13:56:12 UTC
From: n1kxr@comcast.net
Topic: 253 Message: 253

Greetings all,

Just a quick heads up to our Facebook people on the list. Facebook is making changes ~again~ that effect how people with like interests communicate. GROUPS are being done away with for the most part, and PAGES are taking their place. With that in mind, if you're an AR-Beacons group member on Facebook, please come over to our new page located at: https://www.facebook.com/pages/AR-Beacons/216515691709831 Thanks for being a member of our Facebook group and we look forward to seeing you at our new page. To those reading this who are not a member of AR-Beacons on Facebook, please consider this your invitation to come join.

73

255. Message relay

Yahoo group: AR-Beacons
Date: 2011-05-09 23:30:17 UTC
From: N2NXZ
Topic: 255 Message: 255

If anyone is interested, thought I would share this.
If so,contact Bob,K5DZE.
Jim,N2NXZ
.....
Good Morning Guys,

The first 8 beacon ops with beacon websites/pages that okay'd their inclusion are now listed on my web site at
http://www.k5dze.net/BEACON.htm
Just click on the call sign to go to that website.

I will work to keep it updated and current for everyone. I will also add to the list as I get other ops who wish to be included. Please don't hesitate to let me know if any of these links is inop or becomes a dead link in the future. These are some nice sites and should be a good reference for Amateurs interested in 10M Beacons.

Thanks for the input.

273. Interference w/COMCAST

Yahoo group: AR-Beacons
Date: 2011-05-18 23:54:24 UTC
From: Dave
Topic: 229 Message: 273

Appears my beacon, 28.2345Mhz is interfering with the local Comcast cable operations. The cable crew who found my transmitter (KA0SWT; 5w, Pueblo, CO) tell me they use 26.5 to 28.5 for outside cable.

Can that be correct? Isn't this in the Ham band? I turned the beacon off so we can sort it out, but just wondering what other do.

Dave
KA0SWT

Dave,

I had something similar to this a few years back. My next door neighbor said I was getting into his cable. He was rather rude
when I opened my door. He started shouting about how I was messing up his TV and said he was going to contact the FCC. As I
shut the door in his face I said "go ahead and call them" A few days later he asked me to forgive him for the way he acted. I
accepted. Then I went about telling him how his cable probably has a leak. I told him I was licensed by the FCC and operate
within the guidelines. I had a band pass filter inline and all the good stuff to keep spurrious emmissions to a minimum. I
told him the cable company is responseable and it's their job to keep interference out.

Well to make a long story short. His cable company did come and check his system and found two different connectors that were
leaking. They fixed those and he never had another complaint.

Keep your beacon going. You have every right to do so. If you don't have a filter for your beacon I would suggest that you
install one just so you can say it is filtered.

One other thing...If you have cable at your house RF can enter any weak spots. You may want to have your cable checked also.

I think it would be illegal for them to transmit signals on 10m. Most cable companies use much higher frequencies.

I just found this link about cable TV and it seems that some use Sub CATV Band - T7 - T13
7 - 58 Mhz. http://www.csgnetwork.com/tvfreqtable.html

Sucks to be them. You are legal, run your beacon, let THEM sort out THEIR
problem.

This scan just peaked my interest when I realized that Bill, WJ50 had made a scan during the same time period. We are about 350 miles apart. Bill heard 8 10m beacons and I heard 4. It looks like Bill heard at least three beacons by Sporadic E and I heard none via that mode. All my signals were via Trans EEK from SA.

I guess this verifies the spotty nature of Sporadic E. Over the years I have often compared our logs. We usually hear at lot of the same beacons but at times our logs look nothing alike. Go figure. That's what makes this hobby so intriguing.

Good job Bill. Thank You for all your efforts. It make Amateur Radio much more enjoyable.

I have a ICom 746. It needs some work done on it. Auto tuner, back light, and realignment.
Where is the best place to send it? To ICom or someone else?
The warranty has long expired. I would appreciate any helpful comments.
Don

Hi Don,I will post that question to the alternate beacon group.
Hope someone can send you a message about that.
Sorry I have not been posting in awhile.
Will check in later tonight.
Jim,N2NXZ

Don,
Here is some info regarding the ICOM repair.
Jim,N2NXZ
.....
From Drew,KB2SEO

There is a guy who does Icom work in WA. He advertised in QSt and a few on line places. He was pretty reasonable as far as prices. He fixed my 737a when I had it, I think is was all of 60 bucks. If I can find the number and email I'll forward it. ONE PLACE I Would NOT tell ya to send it is the guy in Ft. Pierce FL (or was it melborne) one of the guys from our club waited 3 nmonths, got jerked around and had to threaten them with legal action. He got the rig back, his Credit card was billed 70 bucks... For "service fees"

Sent via BlackBerry by AT&T
From N5YEY,
Comtek is the name of the buisiness. Kuni is the man's name. He does very good work. 360-779-9730 is the number.

Sent from my Verizon Wireless BlackBerry
From Drew KB2SEO,
BINGO! That"s the one! TNX!

292. 10 hr psk31 report for today

Yahoo group: AR-Beacons
Date: 2011-05-24 22:28:57 UTC
From: N2NXZ
Topic: 292 Message: 292

This is TX only reports becasue I had N2NXZ/B running.
Kills the psk31 rig`s RX.
Not as good as it has been...that is because I turned my beacon on :(

Thunderstorms have been the area all day so listening has been difficult
with lots of QRN.

Let's see, how can I say this delicately. Today, 10m propagation sucked.
Only one heard on my first post and none heard in four scans on this post.

1442 Z none heard
1702 Z none heard
1902 Z none heard
2238 Z none heard

Propagation was poor here yesterday also.
Watching propnet and seems things are building for the better today.
Lets see how it goes.

FB JIM,
The band does seem to building here also. I just heard 9. Some from Texas,Argentina, Maine, Florida. Most had good signals.

Jim do you or anyone in the group use Echolink? I use to have it years ago on another computer. I never downloaded it onto this computer until now. I thought someone may want to chat for a few minutes so I can check it out.

Hi Jim,
I just finished calling you on psk31 for about 15 minutes. My last beacon scan I heard W2DLL so I thought maybe I could get
you on psk31.
I also listened and checked all signal I saw but none were yours. Time was about 720 PM eastern. Oh well we will try another
time.

_*The South Carolina 10m Beacon Report from Summerville

*_Tuesday
May 31, 2011

*Wow! The band just exploded into a crescendo of beacon activity.
I heard 44 10m beacons on this long scan. I kept going back
through the band picking up beacons that were not there before.

308. File - Greetings from AR-Beacons

Yahoo group: AR-Beacons
Date: 2011-06-01 09:00:29 UTC
From: AR-Beacons@yahoogroups.com
Topic: 15 Message: 308

Greetings all,

This is the monthly-automated message sent out to members of the AR-Beacons e-mail list. If the AR-Beacons e-mail list is to remain in active status, it must be used periodically. As often as this list is utilized, I understand that this list will not be active at all times.

The purpose of this monthly-automated message is two-fold in its nature.
First, it serves to keep this list from being deleted due to possible periods of inactivity. Second, it provides list members, who may not have received a post in awhile, proof that they are still list members.

There is no need to respond to this message. However, if this is the only message you have received as of late, please feel free to start a new discussion, post an announcement, share a recent bit of good news, or simply send a greeting.

If you have any questions, comments or concerns please send them to the list-owner, or one of the moderators at: AR-Beacons-owner@yahoogroups.com

Thank you for being a member of AR-Beacons e-mail list.

73,
Richard - N1KXR
List-Owner

Yahoo group: AR-Beacons
Date: 2011-06-03 19:39:28 UTC
From: Facility 406 DM09
Topic: 310 Message: 314

According to the Code Of Federal Regulations, Telecommunication, Title 47, Part 97.203, ONE beacon per band, up to 100W each. On HF alone you may operate eight beacons from your house, eight from your neighbours, eight from somewhere else, eight from your car... (see section b)

(a) Any amateur station licensed to a holder of a Technician, General, Advanced or Amateur Extra Class operator license may be a beacon. A holder of a Technician, General, Advanced or Amateur Extra Class operator license may be the control operator of a beacon, subject to the privileges of the class of operator license held.

(b) A beacon must not concurrently transmit on more than 1 channel in the same amateur service frequency band, from the same station location.

(c) The transmitter power of a beacon must not exceed 100 W.

(d) A beacon may be automatically controlled while it is transmitting on the 28.20–28.30 MHz, 50.06–50.08 MHz, 144.275–144.300 MHz, 222.05–222.06 MHz or 432.300–432.400 MHz segments, or on the 33 cm and shorter wavelength bands.

Note that this says "MAY". This DOES NOT limit beacons to these band segments, but it gives you the option of manually or automatically controlling a beacon within these segments, precisely as it states. That means you MAY alternately choose to key your beacon by hand for months weeks and years on end- or not.

Kurt

Hmmm, kind of weird because they will be from the same place (10-meters ?)…lol Maybe one on each band instead…10, 20, 40, etc

Even though that tornado went through my backyard of my old house, the beacon is still alive and well too..:)

Thanks Kurt,
Does this mean I could operate a beacon automatically below 28.2 MHz? I've had someone tell me that I couldn't. I don't see any exclusion in this part. I don't have plans of operating a beacon
down there but it would be nice to know.

Between 28.2 and 28.3 (unattended).. I would stay in the beacon band, because people won't be looking for them there, etc.

But, I think anywhere on the band is legal, but not under the "gentlemans" agreement, etc

319. Re: [AR-Beacons] How many beacons?

Yahoo group: AR-Beacons
Date: 2011-06-04 23:25:19 UTC
From: Facility 406 DM09
Topic: 310 Message: 319

CW is permitted anywhere within the 10m band. Automatic or manual is irrelevant, as best I've been able to determine, the unusal wording of section D is leftover from a partially removed older regulation, think of it as reading "you MAY use electricity to operate your beacon".

Kurt

----- Original Message -----
From: "Don-kg4gvv" <kg4gvv@...>

Does this mean I could operate a beacon automatically below 28.2 MHz? I've had someone tell me that I couldn't. I don't see any exclusion in this part.

320. 10m

06-05-2011 @ 20:43 utc.
Quite the activity now.
I decided to give a scan for beacons and the band just started to pickup
as I was tuning about.
Had to tune the beacon freqs several times top to bottom hearing new beacons each time.
Interesting variety of locations.Not sure about some of the ID`s...new ones?
PSK31 activity also booming...running @ 50 watts here now.

Jim do you or anyone in the group use Echolink? I use to have it years ago on another computer. I never downloaded it onto this computer until now. I thought someone may want to chat for a few minutes so I can check it out.

Hi Don,

I have it on my iPhone but have only played with it a few times. You can try me sometime, I am listed as k7gfh or we could try a node.

Don, Jay and all interested,

I have Echolink on several of my computers (home and laptop). I get on now and again. I'm listed as N1KXR.

_The South Carolina 10m Beacon Reception Reports
_from Summerville, EM93wa & presented by Don,kg4gvv

Tuesday
June 07, 2011

1726 Z
28.2000 LU4AA Buenos Aires,AR 4896 miles/7878 km ALL
28.2245 K5GJR Corpus Christi, TX. 1056 miles/1747 km 529
28.2545 K5AHH Broken Bow,OK 842 miles/1355 km 549
28.2600 AD5KO Mena, AR. 810 miles/1303 km 559

footnote: LU4AA was very lite but I heard all power levels and
all levels have the same signal strength. It sounds like it's Xmit
power is the same for all four tones.

Thank You Darren, Jay and Richard for your response to my email. I've checked out Echolink with their test server and every thing seems to be ok but I haven't had a chance to talk to anyone yet. I placed an alert on each of your call signs. If I see one of you guys on I will try to make contact. I'm usually on Echolink between 7 and 9 PM eastern. Hope to contact all of you guys. Thanks again.

Sorry, but I forgot to place the time of my last scan on my last report.
The time was 18:25 Z. The report was submitted to the list at 18:48 Z

Thank You and please forgive me for the extra band width.

343. Who is the District Director?

Yahoo group: AR-Beacons
Date: 2011-06-15 18:59:34 UTC
From: Don-kg4gvv
Topic: 343 Message: 343

Hi All,

In Part 97 Amateur Beacons it reads ...

(a) Any amateur station licensed to a holder of a Technician, Technician Plus, General, Advanced or Amateur Extra Class
operator license may be a beacon. A holder of a Technician, Technician Plus, General, Advanced or Amateur Extra Class
operator license may be the control operator of a beacon, subject to the privileges of the class of operator license held.

(b) A beacon must not concurrently transmit on more than 1 channel in the same amateur service frequency band, from the same
station location.

(c) The transmitter power of a beacon must not exceed 100 W.

(d) A beacon may be automatically controlled while it is transmitting on the 28.20-28.30 MHz, 50.06-50.08 MHz,
144.275-144.300 MHz, 222.05-222.06 MHz, or 432.300-432.400 MHz segments, or on the 33 cm and shorter wavelength bands.

(e) Before establishing an automatically controlled beacon in the National Radio Quiet Zone or before changing the
transmitting frequency, transmitter power, antenna height or directivity, the station licensee must give written notification
thereof to the Interference Office, National Radio Astronomy Observatory, P.O. Box 2, Green Bank, WV 24944.

(1) The notification must include the geographical coordinates of the antenna, antenna ground elevation above mean sea
level (AMSL), antenna center of radiation above ground level (AGL), antenna directivity, proposed frequency, type of
emission, and transmitter power.

(2) If an objection to the proposed operation is received by the FCC from the National Radio Astronomy Observatory at
Green Bank, Pocahontas County, WV, for itself or on behalf of the Naval Research Laboratory at Sugar Grove, Pendleton County,
WV, within 20 days from the date of notification, the FCC will consider all aspects of the problem and take whatever action
is deemed appropriate.

(f) A beacon must cease transmissions upon notification by a District Director that the station is operating improperly or
causing undue interference to other operations. The beacon may not resume transmitting without prior approval of the District

Director.

(g) A beacon may transmit one-way communications.

Does anyone know anything about the District Directors as referred to in part (f)? Names? How many Directors are there? etc.

Don, kg4gvv

"Does anyone know anything about the District Directors as referred to in part (f)? Names? How many Directors are there? etc."

Wouldn't this be an FCC District Director? I know there is one in LA and one in 'Frisco...

I believe you are correct Kurt. I searched the FCC web site hoping to find a list of the directors but couldn't find anything.

No one is going to call the FCC, hi. Saw it in the part 97 rules about amateur beacons and wanted to know more about it.

_The South Carolina USA 10m Beacon Reception Reports
_from Summerville, EM93wa and presented by Don, kg4gvv

Sunday/Father's Day
June 19, 2011

First scan on this beautifully warm Dad's Day. What a surprise.
34 beacons heard. Most all with good strong signals.

Could this be an indication of better propagation for today?

358. Beacon report

Yahoo group: AR-Beacons
Date: 2011-06-20 01:29:37 UTC
From: N2NXZ
Topic: 358 Message: 358

Sorry for the late post.
Thought I had sent it already :(
Hope all enjoyed Fathers day.
FYI...
Next weekend heading out to camp and will be sending a 10m beacon balloon.
Hope it works out well.
Frequency will be 28.222 + or - .
Not sure on exact freq,but will TX every 1 minute.
I have it going now for testing...hopefully I will get a report
before packaging it up for an idea of exact freq.
Only 200-300 mw RF out.
June 25th sunrise.
Jim,N2NXZ - Rochester,NY

6-19-2011 @ 11:59 utc.
16 heard,others not ID`d.
Sorry if I missed yours.

Thanks for the report Jim. I'll be listening for the beacon balloon. Is this another free flying balloon or will it
be tethered?

Don,
Gonna set it free !
I had troubles making an rf choke for 10m.
I rather use 40m as it seems to operate much better.
Only thing is...not too sure on the rules about balloons/beacons
for 40m.Internet info is terrible and confusing on that issue.
Here is your capture.

_The South Carolina USA 10m Beacon Reception Reports
_from Summerville, EM93wa and presented by Don, kg4gvv

Monday
June 20, 2011

What the heck....I decided to make another scan before the day ends
and I'm glad I did. I heard Cam's beacon in Panama. It's been a long time.

The band is still in fair shape as this day comes to an end.

Good deal. I'll try my best to hear it but I'll have to get up early, hi. I checked on the Jet Srream for that day and it looks like it will be blowing pretty good from west to east. Once it hits the Jet Stream it won't be over the US very long and it should get to Northern Europe fairly quickly. I wish you good luck Jim. Hope it all goes well. Thanks for the capture of my beacon.

I had also checked the jet stream flow.
The intentions was to keep a low level flight...but who knows what
can happen.You never know how these things can work.
Jim,N2NXZ

Will do Don.
I also have some photos from the field day experience.
We had fun with the balloon thing.
Even though it rained on and off and was cold and cloudy until Saturday eve.
The whole project was a hack job.
The (balloons) were a bad idea.It took 3 of us to tie them as they were VERY slippery...lol.
One slipped out of my hands and flew away and another popped.
It took both 14.9 cubic feet of helium to get the thing off the ground.
We were down to 8 balloons and decided to fill the trash bags that were holding the balloons
with helium too...2 bags with 4 balloons each inside were just not enough.
So,with no other choice...used 3 more trash bags filled with helium...the tanks were each on empty.
We were lucky...it did the trick.
Had to repair both the 10m antenna and long wire.First the 10m since it only had lost an element.

It was easier at the time and needed something to tune for 40m.After liftoff,hurried to repair the long wire.

30 minutes after takeoff...the balloon already went into a cloud and 15 minutes later,the signal faded out.

Spent most of the day listening for it...nothing heard.

Here are a few pictures so far uploaded.Having problems getting these up.

Always enjoy sharing radio and camp photos with the group.
Heard your beacon today while testing a new dipole.
I was checking out your photos...the keyer is very similar to the K12 keyer by K1EL.
That is what was used on the balloon.

383. File - Greetings from AR-Beacons

Yahoo group: AR-Beacons
Date: 2011-07-01 09:11:51 UTC
From: AR-Beacons@yahoogroups.com
Topic: 15 Message: 383

Greetings all,

This is the monthly-automated message sent out to members of the AR-Beacons e-mail list. If the AR-Beacons e-mail list is to remain in active status, it must be used periodically. As often as this list is utilized, I understand that this list will not be active at all times.

The purpose of this monthly-automated message is two-fold in its nature.
First, it serves to keep this list from being deleted due to possible periods of inactivity. Second, it provides list members, who may not have received a post in awhile, proof that they are still list members.

There is no need to respond to this message. However, if this is the only message you have received as of late, please feel free to start a new discussion, post an announcement, share a recent bit of good news, or simply send a greeting.

If you have any questions, comments or concerns please send them to the list-owner, or one of the moderators at: AR-Beacons-owner@yahoogroups.com

Thank you for being a member of AR-Beacons e-mail list.

73,
Richard - N1KXR
List-Owner

July 07, 2011

The last scan of the day for me. I too heard Py2RFF but no other Brazilian beacons. The other transequatorial beacon,LU5FB, was very weak at 329. VE3SWS was heard on 2 out of 3 scans today. Very strong this scan at 599.

Thanks for the nice report. Your beacon sounding very strong this morning. Although, now, it seems the bottom has dropped out
and nothing is being heard. I wanted to make a few more 10-10 contacts before the end of the Spirit of 76 contest ends. It
doesn't look too good right now.
Keep up the good work.

Don, kg4gvv

400. Report

Yahoo group: AR-Beacons
Date: 2011-07-12 13:18:39 UTC
From: N2NXZ
Topic: 211 Message: 400

Sorry for the far and few posts.
The band is very active lately.
There is a link to KG4GVV capture with an unusual
interference below.
This occurred 2 times during my scan.
N2NXZ/B is off permanently until it is replaced due to heavy chirping...too many accidental TX without a coax :)
Back to operating a propnet station using the Cobra 135.
28.1188 - psk31 every 5 minutes with CW ID.

07-12-2011 @ 12:20 utc.
Sorry if I missed some.

Don,that would be the last N2NXZ/B for awhile :)
Working on a new beacon and hope to have it up and running by August.
Jim,N2NXZ

Ok Jim,
I'll miss the old beacon but I look forward to the new one. The old one had gotten rather chirpy but I didn't have any problem picking it out in a crowd, LOL. My offer still stands if you still need another keyer.

Nothing at 1655 Z
Nothing at 2010 Z

After two nothings the band came to life and yielded four
from Texas and one from Mississippi.

410. Report

Yahoo group: AR-Beacons
Date: 2011-07-18 02:37:49 UTC
From: N2NXZ
Topic: 211 Message: 410

07-18-2011 @ 01:49 utc.
Had PC issues this weekend...repaired now.
Had nothing transmitting for a few days.
Propnet back on a few minutes ago...lots of signals.
Many beacons...missed some that either faded out or very long delays.
Went to the Rochester airshow...have to say one of the best I have seen
in 20yrs.
We did not go into the main airshow grounds to avoid over priced water
and food.
We just parked and walked a mile to the main airport terminal and stood
on the 3rd level
parking garage...great view and many aircraft passed directly over at
almost eye level at times.
Even the smoke and jet engine fumes passed through us :)
No shade,but nice breeze @ about 90+ degrees...no probs,good tans.
Photos posted later.

413. Airshow / propnet

Yahoo group: AR-Beacons
Date: 2011-07-19 04:28:30 UTC
From: N2NXZ
Topic: 413 Message: 413

Had a few PC issues to deal with and had no time for a beacon scan
today.
Had propnetpsk going on and off.
Nothing too spectacular for propagation here.
A slide show of the local airshow here...my son took the pics,
We were in a great spot.
Will post a short video later.
One of the Angels seemed to have an engine issue...video shows a few
puffs of smoke.
It made quite a sound as it blasted over us.A sound unlike any of the
other aircraft.
It landed before the entire show leaving 1-5 to finish.

Thanks for the offer Don...still have the freakin` beacon keyer here and of course,sent one off on the balloon project.
Still no word if it was found as of yet.
Still hoping for an email about that ...would make the whole thing worth it :)
Jim,N2NXZ

*Hi All,

This report is a couple of days late because of an issue with my cable modem this past week-end.
This morning the ISP issued me another modem and I'm back in business, hi.

Heard 6 Florida beacons. This is the most ever heard on an individual scan. It looks like K6FRC/B won
the "As The Crow Flies Award". Shut the front door Paul!

24 beacons heard

I think so too Jay. Man, Cycle 24 sure is slow to develop. The summer E's are just about over.
That leaves us with mainly F2 which is more or less dependent on the Solar Cycle.

I just looked at Solar activity and it looks very promising in the short term. There are several
Sunspot groups coming into view. I guess we'll just have to wait and see.

Thank You for Your comments. I like this group best.

First scan. A first time heard AC0RR/B. It sounds like more of a buzz than a tone. I may be hearing a strong spur because I heard the strongest part of the signal at 28.2683 MHz which is a little below the coordinated freq. of 28.2708 MHz.

435. File - Greetings from AR-Beacons

Yahoo group: AR-Beacons
Date: 2011-08-01 09:22:08 UTC
From: AR-Beacons@yahoogroups.com
Topic: 15 Message: 435

Greetings all,

This is the monthly-automated message sent out to members of the AR-Beacons e-mail list. If the AR-Beacons e-mail list is to remain in active status, it must be used periodically. As often as this list is utilized, I understand that this list will not be active at all times.

The purpose of this monthly-automated message is two-fold in its nature.
First, it serves to keep this list from being deleted due to possible periods of inactivity. Second, it provides list members, who may not have received a post in awhile, proof that they are still list members.

There is no need to respond to this message. However, if this is the only message you have received as of late, please feel free to start a new discussion, post an announcement, share a recent bit of good news, or simply send a greeting.

If you have any questions, comments or concerns please send them to the list-owner, or one of the moderators at: AR-Beacons-owner@yahoogroups.com

Thank you for being a member of AR-Beacons e-mail list.

73,
Richard - N1KXR
List-Owner

No signals above 28.2255 MHz. The Twilight Zone? Strange
The numbers are down on this scan but the ones that are in
there are remarkably strong. The trans equatorial made a good
showing while a few northeast USA beacons hung in there. A nice
way to end the Zulu day

This is my first scan of the day and I heard absolutely nothing except an enormous amount of
noise. There's a storm brewing just a few miles from here and I can hear even more noise with
all static crashes. Hopefully it will clear in short order and the next scan will be more
productive. Time of scan 18:31 Z. This report was prepared at 19:32 Z

Hi All,

A few minutes after my last post the band started jumping with activity with signals coming from Western USA. The most I've heard on one scan in several months. Central and South America and Canada heard also.

Most of the SA beacons had very little QSB but most of the NA beacons
had moderate slow QSB. Propagation today was poor to fair.
Many weak signals on every scan. The SA beacons were surprisingly
strong for this late in the day.Heard 21 beacons on this scan.

Most of the SA beacons had very little QSB but most of the NA beacons
had moderate slow QSB. Propagation today was poor to fair.
Many weak signals on every scan. The SA beacons were surprisingly
strong for this late in the day.Heard 21 beacons on this scan.

I saw where someone else heard your beacon on DX Summit, N7DB reported it on Aug 06 and Aug 08. KW7Y reported it on Aug 06 also.
You may want to send them a QSL card.

Hello Don and the group.
Been taking a break from radio a few weeks.
Band looks weak lately too.
Hope all is well.
Be back soon ...

Don,
Been away from the radio scene awhile.
Trying to re tool myself but end up sleeping more instead :)
Did a scan this morning...as sent to the 10mbeacons reflector.
Hope to hear you during the next band opening.
Jim,N2NXZ
.....
A quick scan before leaving for work this morning.
KG4GVV
http://www.xbeacon.com/n2nxz/
My ride came @ 7:30 am...very quick scan...
No beacon or propnet station running here for days.
Landlord bought a new piece of crap TV and now hears the 3 watt
psk31 transmissions.
Looking to put a mw 50 mhz beacon on the air soon and a 10m beacon also mw.
Jim,N2NXZ - Rochester,NY

474. 10m final scan

Yahoo group: AR-Beacons
Date: 2011-08-15 23:45:22 UTC
From: Don-kg4gvv
Topic: 474 Message: 474

Monday
August 15, 2011

This is my third and final scan of the day. 5 beacons heard on each scan. Not the best ever but not the worst ever. No USA beacons on this report.

23:19---23:30 Z
28.1770 HP1RCP Cerro Jefe,Panama 1677 miles/2698 km 529

The dull knife of poor propagation has whittled away and left me with nothing but a tooth pick.
Just a sliver of propagation lingers. Just enough to hear four beacons a few minutes before the start of local grey line.

23:09---23:19 Z
28.1770 HP1RCP Cerro Jefe,Panama 1677 miles/2698 km 519

483. Lighthouse Weekend

Yahoo group: AR-Beacons
Date: 2011-08-21 02:11:55 UTC
From: Don
Topic: 483 Message: 483

Just curious...Did any of you make any lighthouse contacts today?
I didn't have any luck. 10m was poor. 15m was better but not great.The other bands didn't seem all that good either.

There were two in particular that I was listening for.The Charlotte Genesee Lighthouse in Rochester, NY. The special call is K2R.

The other is a lighthouse at the northern entrance of the Panama Canal.

We have one more day (Sunday) to make these and other Lighthouse contacts.

Our Beacon buddy Cam,HP1AC, in Panama will be at the controls during the event. He's a dedicated Ham and a good cw op.

It could be a fun day if propagation cooperates, hi.

Hi All,

It's disturbing that I heard more illegal signals, mostly on AM within the 10m beacon band, than I did legal beacons. Friends, our much loved 10m band is being hijacked. I've never heard it this bad before.

I did hear a few beacons through all the interference.On both scans the band was open to South America only so I assume the interference was coming from there.

One very weak trans eq heard at 17:52 Z. Bands of rain from
hurricane Irene are buffeting our area. That may account for
the poor conditions.

Hi All,

Conditions have improved since my last post at 17:52 Z.
This is the first time I heard more Brazil Beacons than
Argentine Beacons. All via Trans equatorial prop.

From: Don-kg4gvv
Topic: 502 Message: 502

*Sunday
August 28, 2011

Scrambled eggs, toast made from wheat bread and coffee.
After enjoying this rather simple breakfast, I set about
listening for 10m beacons. After a quick manual scan no-
thing was heard. So, I immediately made a slow scan and
I'm glad I did because I could hear two beacons.

13:00---13:07 Z 9:00---9:07 AM local eastern
28.2150 KA9SZX Macomb, IL. 775 miles/1247 km 559
28.2665 W5DJT Pocola, OK. 831 miles/1337 km 529

That's it. 10m Propagation is a strange animal.Two signals
417 miles apart and no other signals heard.

73 es a gud Sunday

510. File - Greetings from AR-Beacons

Yahoo group: AR-Beacons
Date: 2011-09-01 09:32:20 UTC
From: AR-Beacons@yahoogroups.com
Topic: 15 Message: 510

Greetings all,

This is the monthly-automated message sent out to members of the AR-Beacons e-mail list. If the AR-Beacons e-mail list is to remain in active status, it must be used periodically. As often as this list is utilized, I understand that this list will not be active at all times.

The purpose of this monthly-automated message is two-fold in its nature.
First, it serves to keep this list from being deleted due to possible periods of inactivity. Second, it provides list members, who may not have received a post in awhile, proof that they are still list members.

There is no need to respond to this message. However, if this is the only message you have received as of late, please feel free to start a new discussion, post an announcement, share a recent bit of good news, or simply send a greeting.

If you have any questions, comments or concerns please send them to the list-owner, or one of the moderators at: AR-Beacons-owner@yahoogroups.com

Thank you for being a member of AR-Beacons e-mail list.

73,
Richard - N1KXR
List-Owner

Hello Don and group,
The rare scans throughout the week were poor.
10m seems to have went quiet for the last several days or so.
Most of the bands are pretty quiet lately...at least on my end.
Hope you all enjoy the weekend...73.

Topic: 518 Message: 518

Hi, Keith here in Amherst, NY

WA6MHZ, chopped up leading character is worse than ever. Every ID sounds like 'MA6' instead of 'WA6'

Regardless, the beacon is 559 along with the following at 1740Z on 04 September:

28.2000 W6WX - 100 watts only
28.2255 W2DLL - 559
28.2491 K8NDB - Long time, No Hear...579
28.2500 K6FRC/B2 - 539, deep QSB
28.2790 MA6MHZ - Actually WA6MHZ, but the ID is chopped, 559
28.2900 N6UN - Weak, ESP to 429
28.3000 K6FRC/B - 539

All F2 propagation except for W2DLL. The sunspots >>ARE<< doing something!

73, Keith, WB2VUO
Amherst, NY: Grid FN02ox
.....

Hi Folks-
First signals I've copied on ten meters (except W6WX) since August 17. Very localized to SE US.Very noisy conditions,
but pleased to see that my new router doesn't cover Bill's signal like that old Linksys WRT54G did.

73, Jerry WA6CDO

Hi Jerry,

I'm home recovering from surgery. Really bored! So, inspired by your post, Jerry, I turned on a radio and set it scanning. Heard:

HP1RCP
LU5FB
LU1FHH
KE4TWI
KJ4QYB (with a lot of hum on it)
N4PAL
N4QDK
KB2SEO
N8RT (with keying freq drift)
WA4GEH
WY5I
WF4HAM
NC4SW
KR4HO
W3HH
W4TIY
KG4GVV
K4FUM
KD4UTQ (chirpy)
W4HEW
WJ5O (with some hum on signal)
ND4Z
K5TLL
KF4MS

Keep in mind, this was just ONE pass through the band. Wow.

VY 73, PS

.....

2011-09-04

No beacons from VK this morning.Later in the day we got some ES.

In the evening South America audible. Later some auroral ES from North East.

Could make sonagrams of DB0UM and DL0IGI with Aurora reflexions.

Hi, Keith here in Amherst, NY

The band shifted south from the Buffalo area. As of 2145Z on 04 September, I am hearing the following:

28.2140 N4PAL - 599 (Yes, really...)
28.2255 W2DLL - 559
28.2348 KI4AED - 539
28.2615 N4VBV - 579
28.2623 WF4HAM - 579
28.2654 KR4HO - 549
28.2692 W3HH - 589
28.2754 KG4GVV - 599 (Again, Yes, really...)

I dug in for some of the other 'regulars and not a peep. It's either good signals this afternoon or no signals.

All the copy was on the doublet except for W2DLL, always better on the vertical.

I'll most likely be posting this evening also.

Hi, Keith here in Amherst, NY

3 reports, not bad so far...

The following were copied between 2215Z and 2300Z on 04 September:

28.1970 LU5FB - 429
28.1989 LU1FHH - 429
28.2046 KE4TWI - 549
28.2124 KJ4QYB - 559
28.2140 N4PAL - 579

28.2225 N4QDK - 599
28.2255 W2DLL - 559
28.2510 WA4GEH - 549

28.2615 N4VBV - 539
28.2623 WF4HAM - 549

28.2654 KR4HO - 559
28.2692 W3HH - 599
28,2754 KG4GVV - 579
28.2815 W4HEW - 599
28.2930 ND4Z - 549

28.2998 KF4MS - 539

The paths were changing as I listened. The S.S. stations were dropping, they were strongest when I first listened and were in the noise at the end. A mix of F2, E-Skip and TE. All we are missing is tropo and aurora. Maybe later, hi!

Subject: [AR-Beacons] What's up with the Sun?

Saturday
September 03, 2011

Hi All,

Today's Solar Flux was 118 and Sunspot count was 139.
Good numbers but poor conditions at my location.

Don, kg4gvv
South Carolina Gamecocks
EM93wa

523. 10m Amateur Radio Beacon Report

Yahoo group: AR-Beacons
Date: 2011-09-05 18:44:45 UTC
From: Don-kg4gvv
Topic: 523 Message: 523

Monday
September 05, 2011
This is a nice way to begin my beacon listening for this day.
15 beacons heard. Most had good signals. All had some degree
of QSB. The Trans Eq path was open to Argentina.

18:01---18:19 Zulu

526. [AR-Beacons] 10m Beacons 2nd report

Yahoo group: AR-Beacons
Date: 2011-09-05 20:44:31 UTC
From: Don-kg4gvv
Topic: 524 Message: 526
Attachments: 2 described; binary payloads are missing from this source WARC

Monday
*September 05, 2011

I believe this report represents a mixture of "E" and F2 propagation.
F2! Maybe we will hear Japan later in the day. wishful thinking eh?
20 of ten metros finest beacons heard.

527. BPSK31 can be frustrating

Yahoo group: AR-Beacons
Date: 2011-09-05 22:08:00 UTC
From: Don
Topic: 527 Message: 527

I was totally frustrated and irratated by the very wide PSK31 signals while trying to make a few contacts on the very popular mode.

Two Ops from South America hogged the whole screen. One from Argentina and one from Guatamala. Together they wiped out the whole screen. It was virtually impossible to make a meaningful contact.

One of the signals even had a spur that I could copy 100%.

On other occasions I've seen USA stations do the same thing.

All they have to do is adjust their ALC to zero and in some cases turn the power down.

If everyone would do that more of us could really enjoy PSK.

73

How wide were there signals Don? Did you happen to take a screen shot? Just curious I have never seen that wide of a psk signal before. Were you on 10 meters.

Thanks for the info,

Jay

One of the signals was centered on 1000Hz and it's side bars extended just past 500 Hz and 1500 Hz. Any near by psk signal
was wiped out by his signal. Yes, I was on 10m. Since he was below 1200 Hz I could see his harmonic on the far right side of
the screen. I copied his harmonic 100%. No screen shots. I wish I had saved a few for future reference.

I know I could have went further up the band but my cq probably wouldn't attract many ops. The best part...this doesn't
happen every day. Thank goodness.

Hi Jim,

I heard W2DLL over in Buffalo for most of the day. I figured the band was open to Rochester so I called You several times during the day.
Sorry I missed you. I'll try again another day.

Hi All,

Well, I finished the day with these unproductive scans which
began at 23:12 Z and ended at 23:32 Z.

I slowly scanned through the band and heard nothing so I
immediately made a second slow scan and still heard nothing.

Nothing plus nothing = nothing

The band was dead on my first scan. Then on the second scan...BAM...beacon signals started coming in from every direction. It was hard to end this scan because the band kept changing. Some beacons would drop out and others started making their presence known. EA4Q had the strongest signal of the bunch. It varied with QSB 579 to 599.

It took two antennas to complete this scan. About half heard on the multi-band dipole and the other half on the Moxon.

What a pleasure hearing so many beacons from such a wide area. The two previous days I heard nothing.

544. Looking for a Schedule

Yahoo group: AR-Beacons
Date: 2011-09-14 23:24:18 UTC
From: Don
Topic: 544 Message: 544

Looking for a CW schedule. Will try any band segment allocated to Technicians. This includes 80m,40m,15m,10m and 6m if we're lucky.

I can copy 20 wpm but enjoy somewhat slower speeds. 18wpm or slower is just fine with me.

If interested email me at kg4gvv@... or we could text live via Yahoo Messenger.

On this scan I heard a TON of illegals on the fives.
They are gradually creeping up the band into the phone
portion.With all those carriers it make listening for
beacons a lot tougher.

Some people throw everything in there. And there are people who don't know the code good, like me, can get

Frustrated.lol

Mine is just VVV DE KB1QZY/B all you need and repeat every 5-10 seconds. IMO

Darren

From: n1kxr@comcast.net
Topic: 556 Message: 558

Don,

This topic is one that has been debated time and time again. Some beacons only give the owner's call, some a bit more information, some send a small novel! It evokes the same furor/emotion/I'm right attitude as the code -v- no code debates. If you Google the topic, you'll see what I mean.

My own thoughts on a beacon’s ID are; Keep it simple, and keep it clean. My own beacon sends out "v v v de n1kxr/b fn32 de n1kxr/b fn32 25 watts". The beacon pauses for five seconds, then repeats the message. This properly IDs the beacon and gives the listener enough information to know where it’s located as well as its power output. New Beacon-Hunters may not know where or how to fully research for this information and every bit of help we can give them is a good thing.

Just my 2cents,

566. CW ops question

Yahoo group: AR-Beacons
Date: 2011-09-28 18:02:08 UTC
From: Don
Topic: 566 Message: 566

There seems to be a goodly number of CW ops that send the two letters
"EN" to acknowledge they have received everything ok. When, in fact
they should be sending the letter "R" for that acknowledgement.

It also seems to me that the majority of these ops are using "bugs".
Since I don't use a "bug" I don't know how hard it is to send an "R"with one. It sounds
like a definite "dit and dah dit" (EN) instead of a continuous "dit dah dit" (R).

If some of you "bug" ops could enlighten me I would certainly appreciate it.

I use a "paddle" or a straight key.

Thanks Guys,
73
Don, kg4gvv

Topic: 229 Message: 569

I'm sorry Jay, I'll try to pay closer attention when I get to 28.2928 MHz. I understand. It seems that I should be able to
hear your beacon also.
Just maybe that antenna change will work. I'll do my best, hi hi.

570. Re: [AR-Beacons] 10m

Yahoo group: AR-Beacons
Date: 2011-09-29 00:22:16 UTC
From: Jay Hendershott
Topic: 229 Message: 570

Thanks Don! Maybe a foil cone on your head will do the trick?? On a serious note does anyone in the group use a HTX-10 fir the beacon and if so is there an easier way to increase the power out on the low setting? Right now I am about 4 watts out and would like to increase to about 7 watts or so. After reading the alignment manual it appears you adjust voltages to set power out instead of the typical way I am used to like bias first then low power out in watts etc. Any help is appreciated.

Thanks

Jay

572. Re: [AR-Beacons] 10m

Yahoo group: AR-Beacons
Date: 2011-09-29 02:41:42 UTC
From: Jay Hendershott
Topic: 229 Message: 572

Think I figured it out on the HTX-100 output power. I put the beacon in high output mode then adjusted the high power pot down to about 7 watts. Seems to be working well, we will see.

> Thanks Don! Maybe a foil cone on your head will do the trick?? On a serious note does anyone in the group use a HTX-10 fir the beacon and if so is there an easier way to increase the power out on the low setting? Right now I am about 4 watts out and would like to increase to about 7 watts or so. After reading the alignment manual it appears you adjust voltages to set power out instead of the typical way I am used to like bias first then low power out in watts etc. Any help is appreciated.

Hello All
This first scan was a good one.The band seemed to be building.

Jay I heard your Oregon beacon with a 539 signal. I had to listen
on your freq for about 8 minutes before it started to make it's presence
known. It started very weak and slowly climbed to 539. In
the background with a very high pitch I could hear W6NIF, which I think,
is a new one for me.

EA4Q had a nice signal at 559 and heard all four pwr levels of ZS6DN
in Pretoria.

A nice first scan although a little late. Better times are just ahead.

579. File - Greetings from AR-Beacons

Yahoo group: AR-Beacons
Date: 2011-10-01 08:54:08 UTC
From: AR-Beacons@yahoogroups.com
Topic: 15 Message: 579

Greetings all,

This is the monthly-automated message sent out to members of the AR-Beacons e-mail list. If the AR-Beacons e-mail list is to remain in active status, it must be used periodically. As often as this list is utilized, I understand that this list will not be active at all times.

The purpose of this monthly-automated message is two-fold in its nature.
First, it serves to keep this list from being deleted due to possible periods of inactivity. Second, it provides list members, who may not have received a post in awhile, proof that they are still list members.

There is no need to respond to this message. However, if this is the only message you have received as of late, please feel free to start a new discussion, post an announcement, share a recent bit of good news, or simply send a greeting.

If you have any questions, comments or concerns please send them to the list-owner, or one of the moderators at: AR-Beacons-owner@yahoogroups.com

Thank you for being a member of AR-Beacons e-mail list.

73,
Richard - N1KXR
List-Owner

*Friday
October 14, 2011

23:16---23:27 Z

This time I was listening for beacons from Alaska and Japan only.
No beacons heard from Japan but I did hear many JA ops in QSO on
SSB.

I had a little luck listening for Alaska beacons. I tried to hear
AL7FS and AC0CW but nothing was heard.

I did hear KM7N in Ketchikan with a 539 signal. I also heard two Alaska ops in
SSB QSO with lower 48.

From: N2NXZ
Topic: 211 Message: 602

Been awhile since scanning beacons.
I have a local interference issue from a television set !
Nothing I can do about it,so hearing beacons is near impossible.
A CB neighbor finally was converted to a licensed ham op.
Les - KD2AVL.
Helped him remove old antenna/rotor and install new 4 element/rotor.

Propnet freqs seem to resist the interference @ 28.1188.
Good stuff today and seem predictable on a daily basis.

That Ad placed to the right sure screws up messages. I had it all nice and neat and now the first part is all jumbled. Grumble, grumble.

606. Beacons / PSK31 Propnet

Yahoo group: AR-Beacons
Date: 2011-10-16 17:33:23 UTC
From: N2NXZ
Topic: 606 Message: 606

10-16-2011 @ 15:34 UTC
I also heard the chirpy beacon Keith mentioned.
Not as bad looking using Argo,but after the message string,
the long tone swoops about 700 Hz.
<http://www.google.com/url?sa=D&q=http://i430.photobucket.com/albums/qq2\

.....
Amazing signals from Europe,SA and NA.
Some stations hearing my .5 watts.
Hoping for something from the Pacific areas later.
Will do a beacon scan when the band shifts that way.

Don,
I have the same issues when copy pasting here.
I learned that you must select Rich Text Editor
before composing a message here.
I wish the Google group list had that option.
Jim,N2NXZ

From: N2NXZ
Topic: 211 Message: 608

Dave,
Yes,heard your beacon no problems.
I laughed when I saw the frequency in the string.
Heard it again today.
Jim,N2NXZ

Thanks Jim. I'll try the Rich Text Editor. It's good to hear from you. I enjoyed the pics you sent with your other post.

610. RE: [AR-Beacons] Beacons / PSK31 Propnet

Yahoo group: AR-Beacons
Date: 2011-10-16 22:21:04 UTC
From: Darren R
Topic: 606 Message: 610

Ive been getting emails on how easy mine is to copy, without all the crap in it. I might

Update it to include FN32.

I guess it□s up to the beacon op to put the format he/she wants. To me, short is good..

Subject: [AR-Beacons] Beacons / PSK31 Propnet

10-16-2011 @ 15:34 UTC
I also heard the chirpy beacon Keith mentioned.
Not as bad looking using Argo,but after the message string,
the long tone swoops about 700 Hz.
http://i430.photobucket.com/albums/qq22/N2NXZ/capt00018.jpg
<http://www.google.com/url?sa=D&q=http://i430.photobucket.com/albums/qq22/N2NXZ/capt00018.jpg&usg=AFQjCNHhUIs82R7emGx3gjuwS-LxnZQ3Pg>
http://i430.photobucket.com/albums/qq22/N2NXZ/capt00019.jpg
<http://www.google.com/url?sa=D&q=http://i430.photobucket.com/albums/qq22/N2NXZ/capt00019.jpg&usg=AFQjCNFdzhoexGyiCvNtbIrfominOORpEw>
http://i430.photobucket.com/albums/qq22/N2NXZ/capt00021.jpg
<http://www.google.com/url?sa=D&q=http://i430.photobucket.com/albums/qq22/N2NXZ/capt00021.jpg&usg=AFQjCNF7SkGGBU6bifwyp-LSPaImxZzfXQ>
And this beacon seems to send absolutely nothing useful @ 1600 Hz.
http://i430.photobucket.com/albums/qq22/N2NXZ/capt00031.jpg
<http://www.google.com/url?sa=D&q=http://i430.photobucket.com/albums/qq22/N2NXZ/capt00031.jpg&usg=AFQjCNHaqfId63HVw-ReT4fXnqXgzngIxQ>
I see another beacon that actually sends the frequency including
decimal point and op name :)

.....
Amazing signals from Europe,SA and NA.
Some stations hearing my .5 watts.
Hoping for something from the Pacific areas later.
Will do a beacon scan when the band shifts that way.

Hi all,

This last scan of the day was a hard one...I really had to listen carefully though all the QRM from illegal AM'ers on the fives.

I don't remember this level of QRM from illegals during Cycle 23. There must be a whole lot more illegal radios now.

10m used to be my favorite band but that is slowly changing. I am seriously considering removing my beacon from 10m and placing it on another band...maybe 6m.

Weather we like it or not, we are slowly losing our band to illegals. Nothing is being done about it and it is getting worse. I'm hearing more of them on the phone portion 28300 to 28500.

Same out here, but I figured we just count on the FCC to fix them. Ooops; like all Federal gov'mt agencies they too are just-about-gone.

Dave

Sunday
October 23, 2011

Hi All,
On my first scan there was bad QRM from 28210 kc
to 28230 kc. It sounded like motor boating and
wiped out all signals within that frequency range.
QSB caused the interfering signal to be S4--S9.
It lasted for the duration of the scan plus 10
minutes or about 23 minutes.

Did any of you hear this interference?

On my second scan I had an interruption and was unable
to complete.

2011-10-24

Again good condx today. Between 16:15 and 16:45 I could see the
☐TKS" on my screen.

628. 10m contesting lids....

Yahoo group: AR-Beacons
Date: 2011-10-31 21:42:57 UTC
From: Don-kg4gvv
Topic: 628 Message: 628

*Monday
OCTOBER 31, 2011

Unlike this past weekend no CQWW lids heard on the beacon
band during this scan.It was nice and quiet with nothing but
beacons being heard.

I emailed a guy and asked him why with all that room..THE BEACON BAND?
I could care less how he replies.

630. Beacon report relays

Yahoo group: AR-Beacons
Date: 2011-10-31 23:24:46 UTC
From: N2NXZ
Topic: 630 Message: 630

Here are a few reports to share with you folks.
FYI,If you hear my psk31 station on 28.118.8 give it a call for auto reply.
Running @ 500 mw.
Jim,N2NXZ
.....
Forward from a French Operator 73 Bill WJ5O

This is my 28 MHz beacon. My location is JN06CI

631. Re: 10m contesting lids....

Yahoo group: AR-Beacons
Date: 2011-10-31 23:26:13 UTC
From: N2NXZ
Topic: 628 Message: 631

SO YOU WANT TO BE A LID!

Lid...a term used in amateur radio to denote a poor operator; one who is inept at the practice of the art.

A monumental problem facing amateur radio today is the alarming amount of poor operators filling the air waves. It is the opinion of many that one of the reasons for this is the fact that many of the new operators really have not been advised about proper operating procedures. Too many of the "amateur radio classes" produced today spend very little, if any, time correcting operating procedures. Their major thrust is to teach the code, cram the theory, and fill out a 610 form!

It is easy to be a lid, it must be, there are so many of them. If you are already a lid, read on. you may find some new "lid-isms." If you are not yet a full-fledged lid, you may learn some new material for your next transmissions.

Probably the most popular is "QRZ the frequency." Nobody can be quite sure what the exact meaning of this is. The ARRL Handbook lists QRZ as a CW "shorthand" signal meaning "Who is calling me?" On phone it may mean something else, although I can't imagine a frequency calling someone! I even heard a W5 utter "QRZ the channel!" Now this guy is a chief lid. The frequency was silent for a while (Probably as most good operators were in a state of shock) and then a signal from afar responded, "This is the channel and I wasn't calling you!"

I think "QRZ the channel" and "QRZ the frequency" are real winners. Use them a lot. You'll chase the good, experienced hams out of their gourds.

Actually, the use of "Q" signals on phone is in itself a true "lid-ism." The "Q" signals were devised by high speed CW operators as a form of "shorthand" in order to speed up their transmissions. What use they have on phone is questionable, as in many cases you can say the actual meaning just as fast. In many cases they cause more confusion than if you would have said the actual meaning. Then you get the real lid who comes off with "QRM-Mary or QRN-Nancy?" Good heavens, why didn't he just say he had interference?

Now, you must be ready with this one at a moment's notice: "HI." Never, ever, laugh if you find something funny. Say "HI" or even better "HI-HI." It doesn't really take the place of laughter, but it tells the other operators that you know how to laugh on CW.

Another one. Always give your callsign phonetically when operating on phone, especially when conditions are good and signals are clear. It's another small way to take up valuable air time without really adding any intelligence to a conversation. To cut a fine line, it is not legal to identify your station by saying "Whiskey Five Victor Sierra Romeo." If your call is issued W5VSR, the identification is "This is W5VSR." If copy is difficult and for clarification, then, "This is W5VSR. Whiskey Five Victor Sierra Romeo." So continue your lid-ism and show how clever you can be with ridiculous phonetics. A good friend of mine is W5BS; he has a lot of self-restraint!!

Are you interested in DX? Put these on your DX lid list, "CQ Dog X-Ray." jazz it up a little by saying, impressively "CQ Dog X-Ray, beaming Asia." Not only does that improve your antenna's directionality, but it lets everyone hearing you think you have a beam, whether you do or not.

The number one, all time lid award of the century goes to those great DX operators who listen down on one frequency in the foreign part of the band and transmit up in the American phone band without ever listening on the transmitting frequency to see if it was clear. Of course, you must use two processors, in tandem, mike gain wide open, and drive your three 8877 final tubes with an SB-220 while bellering forth, "CQ Dog X-Ray" for five continuous minutes, before listening. This is the way to attract lots of attention. Lots of it!

Next on the list is the subject of "Break." I do believe that we inherited that one from the CBers. Just find a comfortable roundtable in progress, and say "Break" or better "Break-Break" or best "Breaker-Breaker." Don't give any calls; neither the station you hear nor your own. Don't listeh for a few minutes first to find out if you can hear all of the stations in the roundtable. Just break in and disrupt everything. If that doesn't work, start tuning up your rig on that frequency. After all, aren't the frequencies there for all to enjoy?

Here are some quickies: Say "Go" or "Come back" or "C'mon, Good Buddy," instead of "Over" if you think you must say anything at all to let the other operator know you are ready to listen to him. Don't forget the all time Broderick Crawford "10-4" or better "That's a big 10-4."

It is a shame the F.C.C. no longer requires us to indicate portable operation. They have taken away another opportunity for the lid-ism---"This is Whiskey Five Very Strong Radio, Port Five." I just typed this on my port typewriter!

RESULTS GUARANTEED!!

Did you ever hear a phone operator who sounds like he's operating from a dungeon? Maybe he is, but even without a dungeon you can get the same effect by turning up your mike gain and holding your Golden Eagle D-104 at least one foot, better at two, from your face. Never close talk a mike. Disc Jockeys never do and they are "cool." When you are on the air, you are "cool" too, so you do the same. Communications microphones are designed to be close talked. Keep that mike gain at a minimum level. That way you won't be transmitting the voices of your wife and kids screaming five rooms away. Of course, to be a super lid in the audio department, do use a "power mike" driving a processor. Everybody knows that the engineers who designed your transmitter purposely made it short on mike gain.

Lastly, when giving your name, refer to it as your "Handle." It's folksy. And be sure to say, "The handle here is Beaver." That's liddier than just plain, "My name is Beaver." It also helps to punctuate your remarks with "By golly" whenever possible and remember whenever in a large roundtable, especially on a VHF repeater, give each and every call sign in the group complete with phonetics when IDing. Also don't forget to add "For ID" after your callsign.

There are many other ways to be a lid, but I feel confident that if more operators were to take a look at this disaster from the lighter side, perhaps we'll all see just how ridiculous most of the phone operation on the ham bands is today. Phone conversation should really not take on a much different atmosphere from talking to your friends on the

telephone. Do you say "Over" or "Break" or the worst "Come back" when you are on the telephone? Well then, why do so many do it on the amateur bands? All of that is ever so redundant on a repeater system where most have "End-of-transmission" beep tones; and of course, there is usually a squelch burst ahead of that, so you actually ended up with a fellow ending his sentence with "Come back".... followed by a squelch burst followed by the repeater's beep and in many cases the repeater carrier dropping. You have just four indications that it's your turn! QSL?

Let's all pay more attention to this problem and see if we can help "Clean up" our operations and put amateur radio operations back up to the more professional nature that it enjoyed before many poor habits of the CB band crept up on us.

This article appeared in the September, 1978, Ham Radio Horizons, entitled "So You Want To Be a Lid!," by A.J. "Buddy" Massa, W5VSR.

October 31, 2011

Hi Y'all,
Heard 20 beacons near the end of the Zulu day. Had a
few weak ones in there but I was able to pull them out
because I didn't have the usual AM intruder QRM. They
must be out taking candy from children, hi.

Good for You , Jim. We all should have emailed him and a few others. The American ops should know better. They get caught up
in the contesting thing and lose all respect for others. They spoil my day (walk all over me) and they get happy. I'm mad as
hell and I;m not going to take it anymore! hi.

Glad my soap box didn't break.

I thought there was a problem with my mobile rug so when I got home I verified on the shack radio that there really was a well know Alaska station making contacts on LSB on 28.300mhz. Heard him right about 28.2975.

635. File - Greetings from AR-Beacons

Yahoo group: AR-Beacons
Date: 2011-11-01 08:43:22 UTC
From: AR-Beacons@yahoogroups.com
Topic: 15 Message: 635

Greetings all,

This is the monthly-automated message sent out to members of the AR-Beacons e-mail list. If the AR-Beacons e-mail list is to remain in active status, it must be used periodically. As often as this list is utilized, I understand that this list will not be active at all times.

The purpose of this monthly-automated message is two-fold in its nature.
First, it serves to keep this list from being deleted due to possible periods of inactivity. Second, it provides list members, who may not have received a post in awhile, proof that they are still list members.

There is no need to respond to this message. However, if this is the only message you have received as of late, please feel free to start a new discussion, post an announcement, share a recent bit of good news, or simply send a greeting.

If you have any questions, comments or concerns please send them to the list-owner, or one of the moderators at: AR-Beacons-owner@yahoogroups.com

Thank you for being a member of AR-Beacons e-mail list.

73,
Richard - N1KXR
List-Owner

Conditions are better than last hours scan but not by much.
The usual Argentine beacons are being heard now and K6LLL and
K8NDB are hanging in there from my last scan.

I'm looking for an even better third scan.

The kg4gvv/b string has been changed from:" kg4gvv kg4gvv kg4gvv/b "
To:"__________de kg4gvv/b EM93wa" The line represents a 4 second carrier (tone).
I had a few complaints (suggestions) that there was no grid locator included. So I got busy and included one. It was easy enough.

642. Re: 10m contesting lids....

Yahoo group: AR-Beacons
Date: 2011-11-03 03:53:44 UTC
From: N2NXZ
Topic: 628 Message: 642

I am tired of these sorts of ops.
Especially after all these years we spent with our beacons and listening to 10m when the band was so called DEAD.
I have a feeling 10m will become too much like 80M when it is really going.
80m is plugged up with ops back to back who seem to think they own each freq,not to mention all the ridiculous amounts of NETS.
I will say this...I WILL call on ANY phone freq I want on 10m...if these folks tell me THE freq is in use because they have been a group for 100 yrs...I will NOT comply.
10m is mine too !!!
If they want to hog freqs,,,they can go back to 80m.
Jim,N2NXZ

644. RE: [AR-Beacons] Re: 10m contesting lids....AND beacon still down

Yahoo group: AR-Beacons
Date: 2011-11-03 16:51:10 UTC
From: Darren R
Topic: 644 Message: 644

Hope I don't run into them, ill camp right on top of them till they decide to leave or change their attitude.lol

Beacon still down. 6 DAYS without power. I have generator powering my house all that time, but don't want to run it.

Might be back this weekend.

From: N2NXZ
Topic: 628 Message: 646

Don,
CW will always separate nonsense from the airwaves.
It is too hard for most of the trouble makers to use :)
I may start doing CW instead.
Maybe that is why I never use Phone anymore...the other day I hooked up the mic to call a station and dust LITERALLY flew out of it.

I'll put beacon back on Friday, even on generator. I'll have to
update my QRZ page too..

It's been good and dark here since 6 pm local but there are
a few good signals still around. With the change in time
local greyline seems to come a lot earlier. In fact, I missed
it today it happened so fast, hi.

In total darkness here is what I heard between 23:25---23:34 Z

28.2118 WB5DYG Gilbert, AZ 1820 miles/2929 km
28.2320 N1FSX Simla, CO 1397 miles/2249 km

Subject: [AR-Beacons] 10 meters

10 meters wide open in the NW today and already hearing lids in the
beacon band. :(

Have a great day!

"Lid...a term used in amateur radio to denote a poor operator; one who is inept at the practice of the art."

What if you practice the art of being a lid?????

Kurt

661. Lid

Yahoo group: AR-Beacons
Date: 2011-11-07 03:25:44 UTC
From: Don
Topic: 661 Message: 661

another definition of Lid. A poor operator, one who does not follow proper procedures or sends sloppy morse code.

This first scan is later than usual but it is a good one. I
heard 31 beacons. I was too late to hear any European bcns.

Trans-equatorial propagation is active.

From: N2NXZ
Topic: 663 Message: 663

I am so amazed by what can be achieved with so very little.
This is how the 10m band has been today.
http://www.xbeacon.com/n2nxz/
And to think...
Cobra 135 SSB > $15.00
Computer and all accessories > Recovered from the curb
Coax > Abandoned in a vacant home
Antenna > Made of shuffle board handles.
Anyone can enjoy ham radio !
Jim,N2NXZ

Hi All,

This scan is just after grey-line (total darkness).
My log looks similar to yours Bill. A lot of weak signals
and a few strong ones. I guess the band is on it's way
out for this Zulu Day.

OUTSTANDING SIGNAL THIS SCAN:W0KIZ 599. FB Bob!

Sorry about the antenna damage Dave. Hope your able to fix it with few problems.

I have a homebrew 10m Moxon which is now 1/2 of a Moxon. A bunch of big fat Crows landed on it and broke it half into. It's on a 30' push up pole. This was my dedicated 10m antenna. Now I need to take it down before the coldest part of winter comes. I don't work so well in very cold weather, hi

Hi Don! Well, it was only one of a couple broken but it was bent in half and the mast sloped to Mars or someplace like that.

Them Crows are BIG birds. Ravens too. Is it the corn or are they waiting for us to grow smaller?

Dave

It could be the corn,hi hi. But I know what it really is...I have two large Pecan trees behind my house and they seem to draw in all the nut eaten critters. Squrills,Blue Jays,Crows they all like Pecans. We had a bumper crop this year so I may get a few.

Yeah them Crows are big. It don't take many to weight an antenna down to the breaking point,especially a light weight Moxon.

Them Crows are smart Dave. I think they are waiting for us to get smaller.

Don

November 23, 2011

Hi Friends,

This scan left me feeling very satisfied. I just heard Jim's Anchorage, Alaska beacon at 20:40 Z with a RST of 559. I don't know about you guys but this is a rare catch for me. I checked my records and didn't find any logging of AL7FS/B so I'm sure this my first time hearing it.

FB Jim,AL7FS, Cycle 24 is turning out to be better than Cycle 24 at least for me it is. My QSL will be sent after the Thanksgiving holiday.

And Happy Thanksgiving to you and all on the list. I'll have to fast for sure after eating all that good food. I'll enjoy it with guilt after I eat all of the Pumpkin pie, hi.

Every body stay safe Black Friday. Don't get trampled. The YL is going shopping but I'm staying home. That way we're both happy.

703. Czech Republic

Yahoo group: AR-Beacons
Date: 2011-12-01 05:49:01 UTC
From: Don
Topic: 703 Message: 703

Hi All,

I received this email report 2 days ago from the Czech Republic. It looks similar to the one Rich,N1KXR, received.

HI dear Donald,
I am today 29.11.2011 14:32UTC received your beacon KG4GVV/B at 28.275.4 MHz. My trx is FT2000 and 3ele.Yagi tribander. MY WWL: JO70GS.
Look at this link: http://www.ok1fhi.cz/images/stories/kg4gvv_beacon.mp3 , there is audio sound clip your beacon. ID3 tags include.

On my site you will find also other audio recordings beacons.

73 Radek, OK1FHI

From: Don
Topic: 704 Message: 704

Right now at 12:50 AM US eastern time I'm hearing a beacon on 6.379 MHz.The string goes like this: "VVV de VXZ VXZ ^ ^". Anyone know anything about this HF beacon. I'v tried finding something on it without any luck.

73 Don, kg4gvv

705. File - Greetings from AR-Beacons

Yahoo group: AR-Beacons
Date: 2011-12-01 09:00:08 UTC
From: AR-Beacons@yahoogroups.com
Topic: 15 Message: 705

Greetings all,

This is the monthly-automated message sent out to members of the AR-Beacons e-mail list. If the AR-Beacons e-mail list is to remain in active status, it must be used periodically. As often as this list is utilized, I understand that this list will not be active at all times.

The purpose of this monthly-automated message is two-fold in its nature.
First, it serves to keep this list from being deleted due to possible periods of inactivity. Second, it provides list members, who may not have received a post in awhile, proof that they are still list members.

There is no need to respond to this message. However, if this is the only message you have received as of late, please feel free to start a new discussion, post an announcement, share a recent bit of good news, or simply send a greeting.

If you have any questions, comments or concerns please send them to the list-owner, or one of the moderators at: AR-Beacons-owner@yahoogroups.com

Thank you for being a member of AR-Beacons e-mail list.

73,
Richard - N1KXR
List-Owner

Don,

NICE! Cool to see our beacons are being heard so far from home.
Gosh, I love this hobby!

Subject: [AR-Beacons] Czech Republic

Hi All,

I received this email report 2 days ago from the Czech Republic. It looks similar to the one Rich,N1KXR, received.

HI dear Donald,
I am today 29.11.2011 14:32UTC received your beacon KG4GVV/B at 28.275.4 MHz. My trx is FT2000 and 3ele.Yagi tribander. MY WWL: JO70GS.
Look at this link: http://www.ok1fhi.cz/images/stories/kg4gvv_beacon.mp3 , there is audio sound clip your beacon. ID3 tags include.

On my site you will find also other audio recordings beacons.

From: "Don" <kg4gvv@...>

Right now at 12:50 AM US eastern time I'm hearing a beacon on 6.379 MHz.The string goes like this: "VVV de VXZ VXZ ^ ^". Anyone know anything about this HF beacon. I'v tried finding something on it without any luck.

FB Kurt, Very interesting. Inquiring minds want to know, hi
Thanks for your informative reply.

I revisited 6.379 MHz tonight and sure enough the v I thought I heard in VXZ wasn't a V but a 4. Thanks for the heads up.
Tonight it is sending what seem to be random morse letters. Must be some kind of code hidden within the code, hi.

Thanks Kurt

Rich,

It really is nice to see 10m awaken. I also got a email report from another Czech ham. His name was Pavel, OK2BMA. Wow! two within 2 days.
Come on Cycle 24 keep going.

716. 10m Lids on RTTY

Yahoo group: AR-Beacons
Date: 2011-12-05 01:38:11 UTC
From: Don
Topic: 716 Message: 716

Hi All,

Today while scanning for 10m beacons I decided to drop down to the BPSK freq of 28.120 and see how much activity was there. I switched to upper side band mode and I was amazed at how many RTTY signals were on that freq and many more crowding the freq. There seemed to be a complete disregard for the PSK ops that are supposedly assigned that freq. What a bunch of LIDS in our amateur ranks. It seems when contesting,anything goes.

Evidently, DX entities follow different rules.

Nobody is "assigned" the frequency. There are "band plans" that others may adhere to, if they choose, but keep in mind, it may be your plan, my plan, some other guys plan, or the plan may be to not follow the plan at all...

Kurt

A lot of people follow them to prevent chaos, but keep in mind, it's only a "plan". There are also a few laws out there regarding frequency usage, but RTTY, a data mode, on a data frequency by plan, isn't one of the laws, nor is RTTY, a data mode, on a data frequency by plan, the indication of an operator being a lid, merely following the bandplan.

Hams worldwide know that 28.120 is used primarily by PSK ops. RTTY ops who intentionally start transmitting on that freq and it wipes out PSk signals are LIDS in my opinion. The freq is
not "owned" by anyone but why transmit on top of an ongoing PSK QSO? I don't call that "merely
following the bandplan".

"Hams worldwide know that 28.120 is used primarily by PSK ops."

I didn't know that. I thought it was for AX.25, which I've operated there for years. I was on a 10m net at 1800 and asked all the Hams there, the net has been active for about two decades now, none of them knew it was "used primarily by PSK ops" either.

"who intentionally start transmitting on that freq and it wipes out PSk signals are LIDS in my opinion."

They are probably saying them same thing about you on their lists. Opinions are like LIDS, everyone can be one...

"The freq is not "owned" by anyone"

That's right.

"but why transmit on top of an ongoing PSK QSO"

Maybe they can't hear you.

"I don't call that "merely following the bandplan"

Perhaps you may not, but they are within the plan and the law.

Maybe you should contact them and tell them the problems you are having. If that doesn't work, call the FCC and start yelling and screaming. When you refer to the other ops, mention their name, callsigns, possible sexual orientation and use a lot of obscenities to draw the FCCs attention to your problem so they can resolve it as quickly as possible.

Don,
Good to hear from you.
Heard several beacons last evening and yours included.
Hoping the band opens again like that tonight.
Tuning around now while organizing my PC.
Had to reload Windows and give it XP SP3 finally :)
This thing has been treating me well for a long time now.
Not bad for an older Intel P3.\
Adding your beacon capture in the yahoo group photo album now.

Jim,N2NXZ

Someone from NZ heard my beacon, but can't find info, because im making up the QSL cards, and can't find their callsign. If

This is you, please let me know.

Thanks J

Greetings all,

This is the monthly-automated message sent out to members of the AR-Beacons e-mail list. If the AR-Beacons e-mail list is to remain in active status, it must be used periodically. As often as this list is utilized, I understand that this list will not be active at all times.

The purpose of this monthly-automated message is two-fold in its nature.
First, it serves to keep this list from being deleted due to possible periods of inactivity. Second, it provides list members, who may not have received a post in awhile, proof that they are still list members.

There is no need to respond to this message. However, if this is the only message you have received as of late, please feel free to start a new discussion, post an announcement, share a recent bit of good news, or simply send a greeting.

If you have any questions, comments or concerns please send them to the list-owner, or one of the moderators at: AR-Beacons-owner@yahoogroups.com

Thank you for being a member of AR-Beacons e-mail list.

Greetings all,

This is the monthly-automated message sent out to members of the AR-Beacons e-mail list. If the AR-Beacons e-mail list is to remain in active status, it must be used periodically. As often as this list is utilized, I understand that this list will not be active at all times.

The purpose of this monthly-automated message is two-fold in its nature.
First, it serves to keep this list from being deleted due to possible periods of inactivity. Second, it provides list members, who may not have received a post in awhile, proof that they are still list members.

There is no need to respond to this message. However, if this is the only message you have received as of late, please feel free to start a new discussion, post an announcement, share a recent bit of good news, or simply send a greeting.

If you have any questions, comments or concerns please send them to the list-owner, or one of the moderators at: AR-Beacons-owner@yahoogroups.com

Thank you for being a member of AR-Beacons e-mail list.

73,
Richard - N1KXR

747. antenna height

Yahoo group: AR-Beacons
Date: 2013-03-04 16:32:43 UTC
From: EriK
Topic: 747 Message: 747

Hello

I have a coordinated 10 meter beacon which was running from my home QTH for awhile,but I QRT'D it due to qrm and having to turn it off when wanting to use 10 meters. My antennas varied between an indoor dipole and a vertical up at 30 ft in a pine tree (when living in a valley you try anything to get your RF out of it :P . I may have a permanent home on a hilltop for it,there's no guarantees but I'm hopeful anyway .

So my question is this : What would be a good overall height to put a 1/2 wave vertical(Shakespeare Pogostick) ?

I want it to be heard state side,but also worldwide .

Does anyone have a magic number they can throw at me ?

Any suggestions,comments are greatly appreciated ..

Thanks
Eric

Topic: 15 Message: 791

Greetings all,

This is the monthly-automated message sent out to members of the AR-Beacons e-mail list. If the AR-Beacons e-mail list is to remain in active status, it must be used periodically. As often as this list is utilized, I understand that this list will not be active at all times.

The purpose of this monthly-automated message is two-fold in its nature.
First, it serves to keep this list from being deleted due to possible periods of inactivity. Second, it provides list members, who may not have received a post in awhile, proof that they are still list members.

There is no need to respond to this message. However, if this is the only message you have received as of late, please feel free to start a new discussion, post an announcement, share a recent bit of good news, or simply send a greeting.

If you have any questions, comments or concerns please send them to the list-owner, or one of the moderators at: AR-Beacons-owner@yahoogroups.com

Thank you for being a member of AR-Beacons e-mail list.

73,
Richard - N1KXR

From: AR-Beacons@yahoogroups.com
Topic: 15 Message: 815

Greetings all,

This is the monthly-automated message sent out to members of the AR-Beacons e-mail list. If the AR-Beacons e-mail list is to remain in active status, it must be used periodically. As often as this list is utilized, I understand that this list will not be active at all times.

The purpose of this monthly-automated message is two-fold in its nature.
First, it serves to keep this list from being deleted due to possible periods of inactivity. Second, it provides list members, who may not have received a post in awhile, proof that they are still list members.

There is no need to respond to this message. However, if this is the only message you have received as of late, please feel free to start a new discussion, post an announcement, share a recent bit of good news, or simply send a greeting.

If you have any questions, comments or concerns please send them to the list-owner, or one of the moderators at: AR-Beacons-owner@yahoogroups.com

Thank you for being a member of AR-Beacons e-mail list.
